H9F Series 4K UHD Android Smart TV

Model # 55H9F

The Ultimate Upgrade

Make the leap to superior picture quality with the Hisense H9F series. Showcasing premium Quantum Dot technology and Hisense's innovative design, the H9F proves to be in the elite class of TVs—inside and out.

The H9F benefits from Hisense's patented ULED technologies. This combination provides the H9F with ultra-power to create backlight control, and PQ enhancing and tuning algorithms to boost color, contrast, brightness and motion. ULED focuses on the most important areas of picture quality as it uses sophisticated processes to transform your entertainment.

1,000+ Nits produces incredible brightness, and an upgrade in local dimming zones enables superior contrast. Motion is consistently smooth thanks to Motion Rate 480 and a 120Hz native panel. Colors come alive with Quantum Dot Technology, which puts more than a billion colors on display. And HDR increases the dynamism so you can fully appreciate the depth of movies and shows.

For easy navigation and plenty to watch, Android TV works with Alexa enabled devices and has built-in Google Assistant to offer a more personal touch. Use the integrated voice search feature for Google Assistant to find answers or search for your favorite program. Enjoy 500,000+ movies and shows, plus video streaming from Netflix, Hulu, YouTube and more.

*Google Assistant-compatible products required to use voice commands

ULED

Take your TV experience from great to incredible. The picture quality of the H9F is driven by our exclusive ULED technologies to boost color, contrast, brightness and motion. All are calibrated to work together in perfect harmony—to upgrade the performance of every pixel and create a picture that transforms your favorite entertainment into your Ultra-new reality.

Peak Brightness/Full Array Local Active Zones

Full Array Local Dimming technology makes the H9F shine brighter. Now with even more zones, that's greater contrast control for impeccable image detail. Instead of appearing washed out, characters in sun-drenched settings stand out. And shadowy figures are easily distinguishable against moonlit scenes. Whether it's playing a video game or binging on today's hottest docu-drama, you will see the difference as you are immersed in it.

Android TV

With Android TV, you can enjoy the best Android has to offer on the biggest screen in your home. Download top Google Play apps and games. Stream more than 500,000 shows, movies, live sports and news from popular channels. Or gather around to watch the hottest videos from YouTube or 1,000+ Chromecast compatible apps. What you want. How you want it. It's all on your H9F, on your terms.

Artificial Intelligence (AI)

The H9F features a powerful AI technology that delivers intelligent picture and audio quality by using algorithms to ensure the optimal viewing and listening experience. This incredibly smart feature continually and intuitively adjusts the areas that matter most to create amazing video and sound. Just plug it in. Turn it on. And don't give it a second thought.

Quantum Dot Wide Color Gamut

The introduction of Quantum Dot and Wide Color Gamut technologies opened some eyes. By combining these two powerful features into one TV, we've unlocked the power of over a billion color combinations perfectly expressed. It's easier to feel connected to what's real while still enjoying the incredible with the H9F Series.

Dolby Vision & HDR10

Dolby Vision High Dynamic Range offers an incredible new vision for experiencing your favorite games, movies and shows by adding dramatic color, contrast and brightness to every second of every scene.

Motion Rate

Blink and you missed it? Think again. The H9F is built with motion in mind for its native 120Hz panel. Premier hardware and smart image-processing work in sync to deliver Motion Rate 480 so you can keep your eye on the ball, a chase scene, or a multi-player battle. Captivating scenes grab your attention – and keep it with smoother motion.

Design

Bezel-less, gorgeous—the H9F represents the height of design, inside and out. While eyes are naturally drawn to the sharp and colorful display, it's impossible to ignore how harmonious the metal accents and ultra-sleek frame makes the TV fit against a wall or on a stand. Or how easily 4K gaming systems and other accessories connect. Even the speakers are strategically placed to maximize sound distribution as well as your sense of style.
