Hisense

A6 Series Hisense Vidaa TV

MODEL 65A60GMV

4K ULTRA**HD**

more clear, more defined

With four times more pixels (8.3 million) than standard high-definition TV's, the Hisense A6 Series 4K Ultra HD Smart TV is built to deliver bright colors and rich contrast. HDR* technology maximizes brightness, the UHD Upscaler brings lower resolution content as close to 4K as possible, and Motion Rate 120 keeps up with the fastest sports, movies and 4K gaming. This series also comes with tons of built-in apps via the Hisense Smart Platform (VIDAA OS), making it easier than ever to personalize your entertainment experience.

4K UltraHD

Delivers more than four times the resolution of a regular 1080p high-definition screen. Along with over 8.3 million pixels, inside you'll find a powerful full array LED backlight at work creating a sharper, more colorful picture.

Vidaa OS

Open a world of content through Hisense's Vidaa OS smart platform. With hundreds of apps at your disposal, getting to your favorite TV show, movie, or game is simple and intuitive.

Works with Alexa

Quickly access entertainment and control your TV with an Alexa device that you already own. With the touch of your remote or a simple voice command, turn on and off the TV, change channels, and much more.

DTS[®] Virtual:X[™]

DTS Virtual:X bridges the gap between the DTS:X codec and the reality of so many consumers' homes, allowing you to enjoy multi-dimensional sound regardless of room size, layout, or speaker configuration.

Dolby Vision[™] HDR and HDR10*

Dolby Vision HDR and HDR10 transforms your TV into an entertainment powerhouse. The image technology from cinemas, now brought together in the home, provide amazing realism that you'll see, hear, and feel like never before.

Motion Rate 120

Don't struggle to keep your eye on the ball—enjoy fast-paced sports, movies and 4K gaming without the lag. Featuring Motion Rate image processing technology, the A6 series keeps the thrills coming by making it easy to follow fast-moving action.

Gaming Mode

Enjoy a better gaming experience. In Game Mode, input lag is significantly improved, so your commands from the controller are virtually instantaneous on the screen.

*HDR viewing experience will vary by model, content availability and internet connection.
