**Quick Problem-Solving Tips .....31**

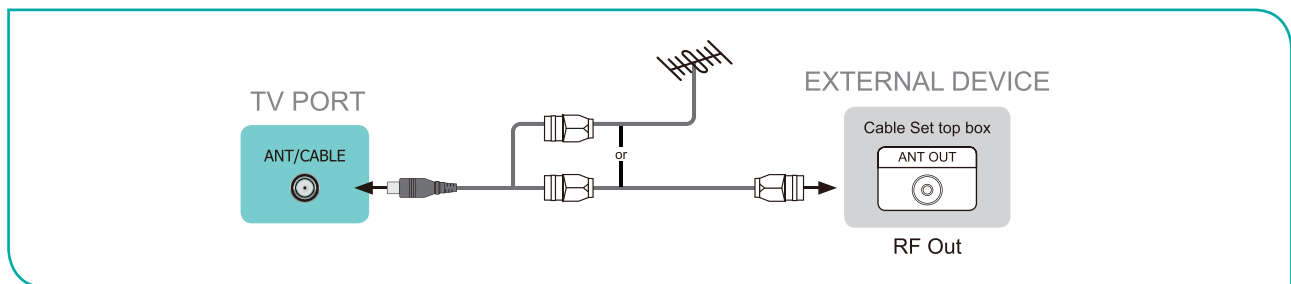

## Connecting Devices to your TV

You have several options for connecting your TV to different devices. The method in which you connect will be based upon the type of cables you have and the available outputs on your device.

### Connecting an antenna, cable set-top box or satellite receiver

To connect an antenna, cable set-top box or satellite receiver:

1. Connect one end of a coaxial cable (not included) to the **RF OUT** port on the antenna, cable or satellite box. If you are using an antenna with twin-lead cable, you may need a 300-75 Ohm adapter (not provided) to connect it to the back of your TV. Likewise, if you are using several antennas, you may need a combiner (not provided).
2. Connect the other end of the cable to the **ANT/CABLE** port on the side of TV.
3. Using your remote, press the **[INPUT]** button and select **ANT/CABLE** as the input source.

### Connecting a satellite receiver, DVD player or other audio visual (AV) device with a composite video cable (yellow/red/white)

To connect an AV device with a composite video cable (not provided):

1. Use the audio and video cables to connect the composite video/audio ports of the external AV device to the **AV IN** ports of the TV. (Video = yellow, Audio Left = white, and Audio Right = red)
2. Plug the connected devices into the AV connectors on the TV before switching it on.
3. Using your remote, press the **[INPUT]** button and select **AV** as the input source.

## Connecting an AV device with an HDMI cable

This 4K TV has two different software versions of HDMI ports to connect HDMI-enabled devices. The two high-powered HDMI version 2.0 inputs enable you to connect 4K Ultra-HD external devices that require more bandwidth to transmit to the TV screen. For example, if you have an X-box or Blu-ray player that supports the 2.0 standard. The two HDMI version 1.4 inputs are great for any of your external devices that support a standard full high-definition resolution of 1080p.

Please refer to the User Manual that came with your device for step-by-step instructions.

To connect an AV device with an HDMI cable (not provided):

1. Use an HDMI cable to connect the HDMI output port of the AV device to the **HDMI** port of the TV.
2. Plug the connected devices into the **HDMI** port on the TV before switching it on.
3. Using your remote, press the **[INPUT]** button and select the corresponding **HDMI** input.

### NOTES

- Because the HDMI connector provides video and audio signals, it is not necessary to connect an audio cable.
- We strongly recommend to use HDMI Cable with 2 cores as shown in the figure.

## Connecting speakers or other audio receivers

To connect speakers or other audio receivers with an audio cable (not provided):

1. Use an audio cable to connect the digital audio in port of the audio receiver device to the **DIGITAL AUDIO OUT** port of the TV. Another option is to use an RCA Y-cable (1/8"-stereo mini to L/R phono) to connect an analog sound system to the **AUDIO OUT** port of the TV.
2. Plug the connected devices into the main power socket before switching on the TV.

- **TIP:** If you prefer to use Audio Return Channel, then see [Connecting a digital sound bar to use Audio Return Channel \(ARC\) on page 7.](#)

### NOTES

- When a digital audio system is connected to the **DIGITAL AUDIO OUT** port, decrease the TV and system volume.
- 5.1 CH (channel) audio is available when the TV is connected to an external device that supports a 5.1 channel surround sound
- You can receive 5.1 channel audio in one of two ways. The first way is to connect the **DIGITAL AUDIO OUT** port

from the device to the Amplifier. The second way is to connect the **DIGITAL AUDIO OUT** port on the back of the TV to the Optical port on the Amplifier. After you've completed one of the two methods then be sure to go into the **Advanced Audio Settings** of the TV and select RAW to receive the 5.1 channel audio. You will need to also go into the sound or audio settings of your device to ensure it is set to 5.1 Channel output. It may read 'Bitstream', 'RAW' or 'Digital'.

## Connecting a digital sound bar to use Audio Return Channel (ARC)

If you'd like to use the Audio Return Channel (ARC) feature to have sound sent from the TV back down an HDMI cable to a digital sound bar, then you will need to connect the cable to the **HDMI / ARC** port. By using this feature, you will also be able to control the sound bar with your TV remote instead of having to use multiple remotes for each device.

To connect a digital sound bar with an HDMI cable (not provided):

1. Connect the cable that's attached to the sound bar to the **HDMI / ARC** port on the TV.
2. Turn on the sound bar by pressing the Power button.
3. Press the [≡] button on your remote and press the [v] button of your remote to select **Settings**, then press [OK] to enter the Settings menu, go to **System > CEC Function**.
4. Turn on the **CEC Control** setting.
5. Turn on the **Audio Receiver** setting.

### NOTES

- Only digital sound bars that require a wired connection are compatible with the TV.
- If the device has an Input Selector feature then make sure to change it to TV.

## Connecting a USB device

You can connect the USB devices such as hard drives, USB sticks and digital cameras for browsing photos, listening music and watching recorded movies.

1. Connect a USB device into the **USB** port.
2. Select the Media type on the **Media** screen or **Home** screen. For more information, see [Media on page 28](#).

### NOTES

- When connecting a hard disk or a USB hub, always connect the mains adapter of the connected device to the power supply. Exceeding a total current consumption may result in damage. The USB1.1 and USB2.0 devices maximum current consumption are 500mA. The USB3.0 device maximum current consumption is 1A.
- For individual non-standard high-capacity mobile hard disk, if its impulse current is greater than or equal 1A, it may cause TV-rebooting or self-locking. So the TV does not support it.
- The USB port supports a voltage of 5V.

## Connecting a headphone

You can connect headphone (not provided) to the **AUDIO OUT** port on your TV. While the headphone is connected, the sound from the built-in speakers will be disabled.

# Connecting Your TV to a Wireless or Wired Network

You have the option to connect your TV to a wireless or wired network to access the Internet. For more information about the network settings on TV, see [Network Menu on page 20](#).

## Connecting to a wireless network

Our built-in wireless LAN adapter supports the IEEE 802.11 ac/b/g/n communication protocols and we recommend that you use an IEEE 802.11n or IEEE 802.11ac router. When you play a video over an IEEE 802.11 b/g connection, the video may not play smoothly.

### NOTES

- You must use the built-in Wireless LAN Adapter to use a wireless network because the set does not support an external USB network adapter.
- To use a wireless network, your TV must be connected to a wireless IP sharer. If the wireless IP sharer supports Dynamic Host Configuration Protocol (DHCP), your TV can use a DHCP or static IP address to connect to the wireless network.
- Select a channel for the wireless IP sharer that is not currently being used. If the channel set for the wireless IP sharer is currently being used by another device nearby, this will result in interference and communication failure.
- If you apply a security system other than the systems listed below, it will not work with the TV.
- If Pure High-throughput (Greenfield) 802.11N mode is selected and the Encryption type is set to WEP, TKIP or TKIP-AES (WPS2 Mixed) for your Access Point (AP), then the TV will not support a connection in compliance with these Wi-Fi certification specifications.
- If your access point (AP) supports Wi-Fi Protected Setup (WPS), you can connect to the network via Push Button Configuration (PBC) or PIN (Personal Identification Number). WPS will automatically configure the SSID and WPA key in either mode.

## Connecting to a wired (Ethernet) network

You can attach your TV to your LAN in one of the three following ways:

### ● Option 1

You can attach your TV to your LAN by connecting the **LAN** port on the back of your TV to an external modem using a Cat 5 LAN cable. See the illustration below.

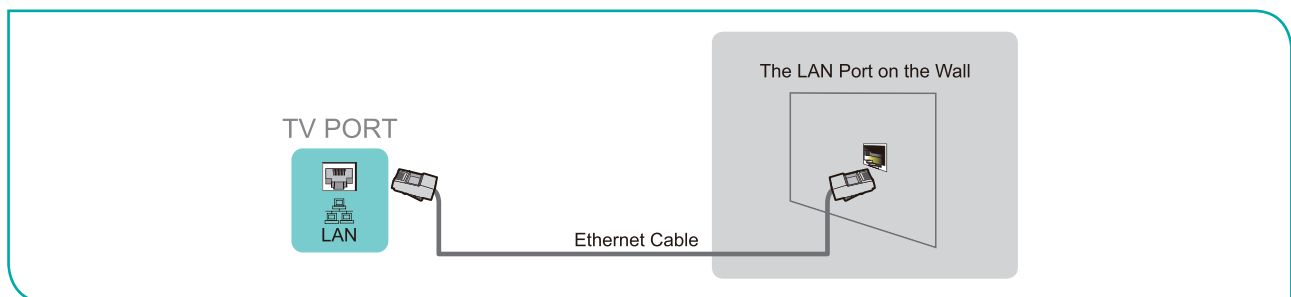

### ● Option 2

You can attach your TV to your LAN by connecting the **LAN** port on the back of your TV to an IP Sharer which is connected to an external modem. Use an Ethernet cable for the connection. See the illustration below.

### ● Option 3

Depending on how your network is configured, you may be able to attach your TV to your LAN by connecting the **LAN** port on the back of your TV directly to a network wall outlet with an Ethernet cable. See the diagram below.

If you have a Dynamic Network, you should use an ADSL modem or router that supports Dynamic Host Configuration Protocol (DHCP). Modems and routers that support DHCP automatically provide the IP address, subnet mask, gateway, and DNS, so you don't have to enter them manually. Most home networks are Dynamic Networks.

Some networks require a Static IP address. If your network requires a Static IP address, you must enter the IP address, subnet mask, gateway, and DNS values manually on your TV's Cable Setup Screen when you set up the network connection. To get the IP address, subnet mask, gateway and DNS values, contact your Internet Service Provider (ISP).

#### ☑ NOTE

- You can use ADSL modems that support DHCP if your network requires a static IP address. ADSL modems that support DHCP also let you use static IP addresses.

# Using Your TV Remote Control

## Buttons on your TV remote

#### NOTE

- Check information according to the actual remote control in the accessory bag.

## Remote control range information

- The remote control can work at a distance of up to 26 feet in front of the TV set.
- It can work at a 30 degree horizontal or vertical angle.

## Begin using your remote

1. Slide the back cover to open the battery compartment of the remote control.

①

Gently push and slide

②

Insert the batteries

③

Gently push and slide

2. Insert two AAA size batteries. Make sure to match the (+) and (-) ends of the batteries with the (+) and (-) ends indicated in the battery compartment.

3. Replace the battery compartment cover.

### NOTES

- Discard batteries in a designated disposal area. Do not throw them into a fire.
- Remove old batteries immediately to prevent them from leaking into the battery compartment.
- If you do not intend to use the remote control for a long time, remove the batteries.
- Battery chemicals can cause a rash. If the batteries leak, clean the battery compartment with a cloth. If chemicals touch your skin then wash it immediately.
- Do not mix old and new batteries.
- Do not mix alkaline, standard (carbon-zinc) or rechargeable (NiCd, NiMH, etc.) batteries.
- Do not continue using the remote if it gets warm or hot.
- Call our Support Center immediately on the support website.

## Program your universal cable or satellite remote control to operate your new television (only for USA)

If you would like to program your other household remote controls to your new television, please refer to the User's Manual supplied by your Cable or Satellite provider. The Cable or Satellite providers' User's Manuals should include instructions on how to program their remote to your television.

A list of codes for the most common Cable and Satellite providers are listed below. Use the code that is associated with your Cable or Satellite provider (if applicable).

### DIRECTV

0178, 10178, 10019, 10748, 11314, 11660, 11710, 11780, 12049, 10171, 11204, 11326, 11517, 11564, 11641, 11963, 12002, 12183

### Time Warner Cable

386, 0178, 10178, 400, 450, 461, 456, 0748, 1463, 0463, 10463

### Comcast

0178, 10178, 10463, 11463, 10748, 11314, 11660, 10171, 11204, 11326, 11517, 11641, 11780, 11785, 11892, 11963, 12002

### Cox Communications

0178, 10178, 1326, 1463

### Dish Network

505, 627, 538, 720, 659

If the code associated with your Cable or Satellite provider is not listed, does not work or you cannot locate the instructions to program your remote, call your local Cable or Satellite provider's customer service center.

If your Cable or Satellite provider does not have a code available, please contact us.

## Using your cable set-top box or satellite receiver remote as a 'universal' remote

If you prefer to use your Cable Set-top Box or Satellite Receiver Remote as a 'Universal Remote', then visit the Support page to view a list of the codes.

## Completing the First-Time Setup Menu

Press the [  ] button on the remote to turn on the TV.

After the splash screen that displays the logo appears, begin the first-time setup menu.

Screen	Task
<b>Language and Location</b>	Using the D-pad arrows of your remote, choose your <b>Language</b> , <b>Region</b> and <b>Time Zone</b> .
<b>End User License Agreement</b>	Choose <b>Decline</b> or <b>Agree</b> . If you choose <b>Agree</b> , then select <b>Continue</b> icon and press [OK].
<b>Usage Mode</b>	<p>Select <b>Home Mode</b>(which appears by default).</p> <div>  <b>NOTE</b> <ul style="list-style-type: none"> <li><b>Store Mode</b> and <b>Store Mode(Video Demo Only)</b> should only be selected by Retailers who plan to demonstrate the TV.</li> </ul> </div>
<b>Network Connection</b>	If your TV does not automatically detect an Ethernet connection, then use a wireless network. Select your network from the list that displays, input the password. Also you can add a hidden network.
<b>Product Registration</b>	Register to stay up-to-date with news and updates about your TV.
<b>Last step of TV setup</b>	You are at the last step of TV setup. If you have not connected network, you can select 'Set up network' or 'Use without network'. If you have connected network, Congratulations! You have completed TV setup. Start to use.

# Shortcuts Instructions

---

You can use shortcuts on the remote control for fast operation.

## Turning your TV on or off

- To turn your TV on:
  1. Connect the power cord to the back of the TV, then plug the power cord into an AC outlet.
  2. When the TV is powered on, press the **[⏻]** button on the remote to turn on TV.
- To turn your TV off, press the **[⏻]** button on the remote.

### NOTES

- When your TV is in standby mode, it is still consuming power. To completely disconnect power, please remove the plug from the AC outlet.
- If your TV does not receive an input signal for several minutes, it automatically goes into standby mode.

## Selecting the input source

Select the Input Source depending on the video device you have connected to your TV.

To select the input source:

1. Turn on your TV, then press the **[INPUT]** button on the remote, the list of Source appears.
2. Press the D-pad arrows of your remote to select the input source.
3. Press the **[OK]** button to confirm your selection.

## Using the Live TV

To view broadcast programs, press the **[TV]** button on your remote.

### Channel search guide

When you select ANT/CABLE as input, if no TV channels were saved before, you will be prompted to do a channel search. You can also go to **Settings** menu > **Channel** to change the channel settings.

### Launch Live TV

After channel tuning is done for the first time, the screen will display Live TV operating tips, including: how to load the channel list, how to Load info Bar and so on.

**[Menu]** Load more functions

**[OK]** Load Channel List

**[▲]** Load Info Bar

**[BACK]** Load previous channel

## Viewing channel information

As you use the **[CH<sup>^</sup> / CH<sup>v</sup>]** button on your remote to scroll through channels, an information banner appears on the top of the screen.

The information banner displays the following information:

1. Channel number
2. Lock status
3. Input
4. Program name
5. Show identification
6. Channel name
7. Current date and time
8. Beginning and end time of the next program
9. Start/Stop time progress bar of the current program
10. Prompt

If you are watching a particular channel, you can also press the up arrow button of your remote to view channel information.

## Viewing a channel list

After you have done an automatic channel scan (if you're using an antenna) or are receiving your channels through a cable provider, you can view your list of channels by pressing **[OK]** on your remote.

You will see the channel list display on the right side of the screen.

## Creating a Favorite List

To quickly access your most-watched channels, you can create a Favorite List.

To create your Favorite List:

1. Press the **[≡]** button on your remote.
2. Press the **[v]** button to select **Settings**, and then press **[OK]** button to enter the Settings menu.
3. Select **Channel > Favorite List**.
4. Using the **[^ / v]** buttons of your remote, select a channel and press **[OK]** button.

A heart-shaped indicator will appear beside the channel as confirmation that it has been successfully added.

## Viewing your Favorite list

To view channels that you've added to your Favorite List simply press **[OK]** on your remote to call out the channel list.

The channel list appears on the right side of the screen and heart-shaped icons are shown next to the channels that make up your Favorite List. You can press **[< / >]** buttons to switch the channel list (**Antenna** or **Cable**) , **Favorite** and **History** list.

## Using the Menu Function

To quickly access menu function, press the [≡] button on your remote.

### Accessibility

You can set **Menu Audio**, **Video Description** and **High Contrast Menu** on or off. The function can be used to meet the needs of visually impaired people.

When the **Menu Audio** is set on, the contents of each menu display can be broadcast out.

When the **Video Description** is set on, you can hear the introduction of relevant programs.

When the **High Contrast Menu** is set on, the comparison of menu items is more vivid.

### Number Pad

You can press digital keys on the left of the screen, to get the relevant channels easily.

### Picture Mode

If you'd like to configure the settings for your picture, then there are seven types of picture modes available: **Vivid**, **Standard**, **Energy Saving**, **Theater**, **Game**, **Sports** and **Calibrated**.

### Sound Mode

Select a preset sound mode to suit the type of content you are listening to: **Standard**, **Theater**, **Music**, **Speech**, **Late Night** and **Sports**.

### Picture Size

Adjust the Aspect Ratio to stretch or zoom in on your picture. You can choose from the following settings: **Auto**, **Normal**, **Zoom**, **Wide**, **Direct**, **Dot-By-Dot**, **Panoramic** or **Cinema**.

### CC

You can switch between **CC Off**, **CC On** and **CC On When Mute**.

### Audio Language(MTS)/SAP

You can choose the audio language(MTS) in DTV mode and you can set SAP for Mono, Stereo or SAP in ATV mode.

### Audio Only

When you select this option, the screen will not display the picture. You can only listen the audio. Press any button except the [⏻] button, **Volume [+/-]** buttons and [🔇] button to restore operation.

### Settings

The Settings Menu consists of the following settings: **Picture**, **Sound**, **Network**, **Channel**, **Accessibility**, **System** and **Support**.

# Basic Settings

---

Your TV comes with many TV setting features to allow you to customize the picture based on your viewing preference and environment. As you navigate throughout different screens to access settings, some of the indicators appear as words On and Off.

## Using the Settings Menu

You can press the [  ] button to access the **Menu**, press the [  ] button on the D-pad to select **Settings**, and then press [OK] button to enter the **Settings Menu**.

The **Settings Menu** consists of the following settings:

- **Picture**
- **Sound**
- **Network**
- **Channel**
- **Accessibility**
- **System**
- **Support**

In each menu, you can:

- Press the [  /  ] buttons to select an item.
- Press the [OK] buttons to enter the sub-menu or to set on or off.
- Press the [ < / > ] buttons to adjust the value.
- Press the [BACK] button to return to the previous menu.
- Press the [EXIT] button to exit the menu.

## Picture Menu

- **Picture Mode:** Select a preset mode that best suits your preference and viewing environment, there are some types of picture modes available: **Vivid, Standard, Energy Saving, Theater, Game, Sports** and **Calibrated**.
- **Picture Size:** Adjust the picture aspect ratio based on the content you are watching. You can choose from the following settings: **Auto, Normal, Zoom, Wide, Direct, Dot-By-Dot, Panoramic** or **Cinema**.
- **Picture Mode Settings:** Adjust display settings for each Picture Mode.
  - **Apply Picture Settings:** Remember customized settings when using the Picture Mode on current source or all sources.
  - **Backlight:** Adjust Local Dimming, Backlight Level, Automatic Light Sensor and Minimum Backlight to change the overall brightness of the screen.

### NOTE

Some models don't support the function of Local Dimming.

- **Contrast:** Increase or decrease contrast between light and dark colors.
- **Brightness:** Adjust the Brightness level to generate lighter or darker images.
- **Color:** Adjust the color intensity level.
- **Tint:** Adjust the colors from green to magenta tint to view the natural skin tones of people on the screen.
- **Sharpness:** Improve sharpness of the picture edges.
- **Overscan:** Turn on if you are receiving analog antenna or cable input.
- **Color Temperature:** Adjust the white color shade.
- **Motion Enhancement:** This setting reduces judder and blur in moving objects. You can adjust it from Smooth, Standard, Clear, or Off. A Smooth setting will minimize judder in moving objects whereas a Clear setting will minimize blur in moving objects.

### NOTE

- Some models don't support the function of Motion Enhancement.
- **Digital Noise Reduction:** Improve picture clarity by reducing video noise.
- **HDMI Dynamic Range:** Select Limit for 480p DVD players and select Full for Blu-ray.(HDMI mode only)
- **Active Contrast:** Automatically adjust contrast according to video content to improve detail.
- **Expert Settings:** Adjust the color space and Gamma to best suit the content you're viewing.
- **Reset Picture Settings:** Reset all picture settings to factory default.

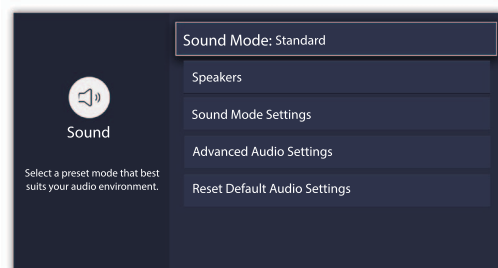

## Sound Menu

- **Sound Mode:** Select a preset sound mode to suit the type of content you are listening to: **Standard, Theater, Music, Speech, Late Night** and **Sports**.

Set the sound effects to suit your preference.

Configure your audio settings for your sound preferences. Once you choose the mode, you can adjust the audio based on the following settings:

- **Speakers:** Switches the sound from the TV speakers to Optical or HDMI ARC output connectors.
  - **TV Speaker:** Disable the TV speaker when you are using a sound bar, ARC or any other external audio amplifier.
  - **Digital Audio Out:** Select the digital audio output format for your external audio device.
  - **Digital Audio Delay:** Adjust the digital audio output delay time to sync sound from an external speaker with the

images on the TV.

- **Lip Sync:** Synchronize the displayed image with the audio output.
- **Balance:** Emphasizes sound from the left or right speaker.

#### ● Sound Mode Settings

- **TotalSonics™ Total Sonics:** Optimizes overall sound quality by increasing bass, widening the sound field and provides a clear, natural dialog.
- **TotalSurround™ Total Surround:** Provides surround sound experience by utilizing psychoacoustic processing to place sound aside, behind and above the viewer. For best results use with Total Sonics.
- **TotalVolume™ Total Volume:** Maintains consistent loudness levels from wide dynamic range programs, loud commercials, and channel or input changes.
- **Equalizer:** Adjusts low to high pitch sounds.
- **Wall Mount setup:** Improves sound for wall-mount position.

#### ● Advanced Audio Settings: Tune the audio settings and quality of the TV.

- **Preferred Audio Language:** Sets the audio language based on your preference. (The preferred language must be supported by the broadcaster.)
  - **Audio Out:** Change the way audio is sent through the type of device that's connected to your TV Audio Out port.
- **Reset Default Audio Settings:** Reset all audio settings in current audio mode to the factory default values.

## Network Menu

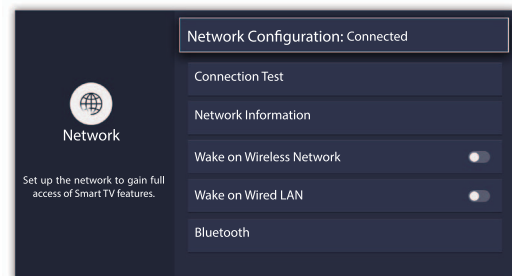

#### ● Network Configuration: Configure network settings to connect to an available network.

When the Connection Type is **Wired LAN**, means you choose a wired network connection to access the Internet.

- **IP Settings:** Configure the IP setting for your network connection.

When the Connection Type is **Wireless**, means you choose a wireless network connection to access the Internet.

- **Refresh:** Refresh wireless network.
- **Add:** You can add wireless network.
- **Advanced Settings:** Configure the advanced wireless network settings for the TV.

#### ● Connection Test: Tests the status of your network connection.

#### ● Network Information: View information about your network connection.

#### ● Wake on Wireless Network: An application on your second screen with Wake on Wireless will turn on your TV when you use the feature.

#### ● Wake on Wired LAN: An application on your second screen with Wake on Wired LAN will turn on your TV when you use the feature..

#### ● Bluetooth: Connect to the network using Bluetooth technology.

#### 📌 NOTE

- Some models don't support this function.
- A Bluetooth device may hum or malfunction, if the problem persists, try connecting the device using the digital optical port or the HDMI (ARC) port.

## Channel Menu

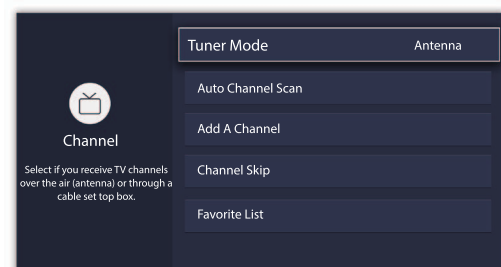

#### ● Tuner Mode: Select if you receive TV channels over the air (antenna) or through a cable set top box.

#### ● Auto Channel Scan: Automatically scan for channels.

#### ● Add A Channel: Type in a channel to add it manually to your TV.

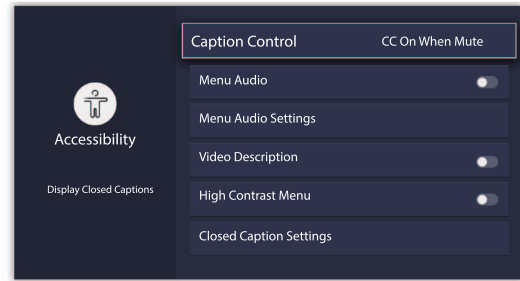

#### ● Channel Skip: Skip selected channels from your Channel List.

#### ● Favorite List: Add Channels to your Favorite List.

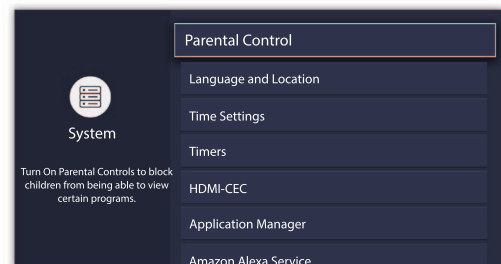

## Accessibility

- **Closed Captioning:** Displays closed captions.
- **Menu Audio:** Reads the menu items for visually impaired.
- **Menu Audio Settings:** Allows customization of spoken menu language.
  - **Volume:** Sets the volume level of the spoken menu language.
  - **Language:** Selects the spoken menu language.
  - **Rate:** Changes the rate of speech.
  - **Pitch:** Changes the audio menu pitch.
  - **Focus Menu Audio:** Lowers the background volume when menu audio is spoken.
- **Video Description:** Enables broadcasted descriptive audio for visually impaired.
- **High Contrast Menu:** Improves contrast for visually impaired.
- **Closed Caption Settings:** Allows customization of closed caption text display.
  - **Analog Caption:** Select an Analog Caption setting from Off, CC1-CC4, Text1-Text4.
    - CC1-CC4:** Closed captioning appears in a small banner across the bottom of the screen. CC1 is usually the “printed” version of the audio. CC2-CC4 display content are provided by the broadcaster.
    - Text1-Text4:** Closed captioning that covers half or all of the screen. Text1-Text4 display content are provided by the broadcaster.
    - Off:** To turn off the Analog Caption.
  - **Digital Caption:** Select a Digital Caption setting: Off, CS1-CS6.
  - **Digital CC Settings:** There are two caption styles. One is the **Automatic** function set as the broadcaster, while the other is the **Custom** style where you can adjust the **Size**, **Font**, **Text Color**, **Text Opacity**, **Background Color** etc.

## System Menu

- **Parental Controls:** Turn On Parental Controls to block children from being able to view certain programs. The password is required to be set when you use this function for the first time. For more information about Parental Controls, See [Parental Controls on page 24](#).
- **Language and Location:** Select the language used for this TV and your location.
  - **Language:** Select the language used for this TV.
  - **Keyboard Layout:** Change TV keyboard layout language.
  - **Location:** Choose the location from where you will watch your TV.
- **Time Settings:** Configure time and date.
  - **Time Zone:** Select your time zone.
  - **Time Format:** Display the timer in a 12 or 24-hour format.
  - **Daylight Savings:** Turn on to apply Daylight Savings Time.
  - **Date and Time:** Select your preferred method of setting the time.
- **Timers:** Configures Sleep Timer, Power On Timer, Power Off Timer and Menu Timeout.
  - **Sleep Timer:** Set the sleep timer to automatically turn the TV Off within a specified time: Off, 10 Minutes, 20 Minutes, 30 Minutes, 40 Minutes, 50 Minutes, 60 Minutes, 90 Minutes and 120 Minutes.
  - **Power On Timer:** Automatically turns the TV on at the set time.
  - **Power Off Timer:** Automatically turns the TV off at the set time.
  - **Menu Timeout:** Turns the menu off after the chosen amount of time: 10s, 20s, 30s, 60s or Off.

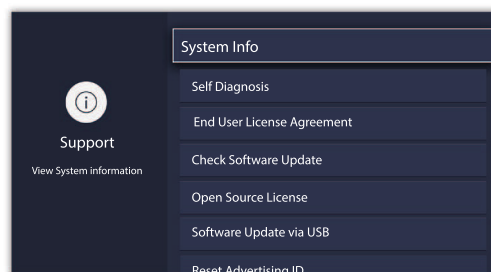

- **HDMI-CEC:** Control your TV and CEC-enabled devices with one remote.
  - **HDMI-CEC:** Turn on to control your TV and CEC-enabled devices with one remote.
  - **Device Auto Power Off:** Turns CEC-enabled devices off with the TV remote.
  - **Device Auto Power On:** Turns CEC-enabled devices on with the TV remote.
  - **TV Auto Power On:** Turns the TV on with the remote of a CEC-enabled device connected with your TV.
  - **Audio Receiver:** Allow the Audio Receiver to send audio over an HDMI cable and back to or from your TV.
  - **CEC Device Lists:** View a list of all CEC-enabled devices.
  - **Device Connect:** Allow connected devices to the HDMI ports to communicate back and forth with the TV.

#### ✓ NOTES

- HDMI cables must be used to connect HDMI CEC-compatible devices to your TV.
- The HDMI CEC feature of the connected device must be turned on.
- If you connect an HDMI device that is not HDMI CEC-compatible, all the HDMI-CEC Control features do not work.
- Depending on the connected HDMI device, the HDMI-CEC Control feature may not work.
- **Application Manager:** Play content from another device and remove this TV from your application accounts.
  - **Anyview Stream:** Allows to view videos, images and music shared from another device in your network.
  - **Netflix:** Remove this TV from your Netflix account. Please contact Netflix if you want to stop being billed for your service.
  - **VUDU:** Sign out and remove this TV from your list of authorized Vudu devices.
- **Alexa Voice Control:** Use your voice to control the TV, other smart devices, and more.
  - **Voice Service Control:** Turn on and off Alexa service.
  - **Voice Service Setup:** Set up accounts to use Alexa service.
  - **Setup Tutorial:** Check the current settings of Alexa and guide the user to set up.
  - **Things to try:** Show the main functions that the Alexa can support currently.
- **Advanced Settings:** Access the Advanced Settings menu.
  - **TV Name:** Choose a name for your TV. This is the name that appears on other devices in your network.
  - **Power LED:** Sets the power indicator light to On or Off during standby.
  - **Audio Only:** Turn off the display when playing the audio. Press any button except the [  ] button to turn the display back on.
  - **Input Names:** Customize the name of your inputs.
  - **Live TV Input:** Change Live TV input.
  - **Screensaver:** Enable Screensaver when the TV is idle.
  - **Notifications Pop-ups:** Activate to receive important system notifications and latest content recommendations. View all notifications on Home > Notifications.
  - **Automatic Content Recognition:** Provide useful information based on content that appears on your TV, i.e. popular TV shows.
  - **Send Diagnostics and Usage:** Send diagnostics and usage data to help improve product and service quality. (No personal information is collected.)
  - **Usage Mode:** Set the TV to use in Home or Store Mode.
  - **Setup Assistant:** Start the Setup Assistant if you want to set up your TV again.

## Support Menu

- **System Info:** View system information.
  - **Signal Info:** Show signal information of current input.
  - **Network Connection:** View your TV's network connection information.
  - **Input Connections:** View your TV's input information.
  - **Version:** View your TV's software version and hardware code.
- **Self Diagnosis:** Perform self diagnosis to test sound, picture and connections.
- **End User License Agreement:** Click to read our terms and policy.
- **Check Software Update:** Check if your TV needs software update.
- **Open Source License**
- **Software Update via USB:** Upgrade TV software from USB device.
- **Reset Advertising ID:** Reset your advertising ID. You may still receive the same number of ads but they may not be relevant to your interests.
- **Factory Reset:** Reset your TV to the factory settings.

## Parental Control

The Parental Controls setting allows you to block content that is not appropriate for children to watch. You can do this by creating a 4-digit password.

### Turning Parental Control On

1. Press the [  ] button on your remote.
2. Press the [  ] button on the D-pad to select **Settings**, press [ **OK** ] button to enter the Settings menu.
3. Select **System > Parental Control**.
4. Press the [ **OK** ] button on your remote, a Create PIN window displays. Using the numerical keypad on the window, create the password.
5. Press the [ **OK** ] button to turn the **Parental Control** On.

You will see the Parental Control settings change from a greyed out state and become highlighted. When this occurs, begin adding other settings to the **Scheduled Blocking**, **Channel Blocking**, **Programme Blocking**, **Input Blocking**, **App Blocking**, **Change PIN** or **Reset Parental Control Defaults** features.

- **Scheduled Blocking:** Blocks all channels and programs during selected periods of time.
- **Channel Blocking:** Blocks selected channels.
- **Programme Blocking:** Blocks programs by ratings.
- **Input Blocking:** Blocks selected inputs.
- **App Blocking:** If an app that you want to restrict doesn't appear here then check the Parental Control settings in the app.
- **Change PIN:** Changes the PIN that you use to access Parental Control.

#### NOTE

- If you forget your password, call the **Consumer Electronics Care Center**.
- **Reset Parental Control Defaults:** Reset Parental Controls back to the factory default setting.

### Description of US TV Ratings

Content	Defined as
<b>A</b>	All
<b>D</b>	Suggestive dialog
<b>L</b>	Coarse or crude language
<b>S</b>	Sexual situations
<b>V</b>	Violence
<b>FV</b>	Fantasy Violence

### Description of Age-based Ratings

Age	Defined as
<b>TV-Y</b>	All children
<b>TV-Y7</b>	Directed to older children
<b>TV-G</b>	General audience
<b>TV-PG</b>	Parental Guidance Suggested
<b>TV-14</b>	Parents strongly cautioned
<b>TV-MA</b>	Mature Audiences Only

## US Movie Ratings

Rating	Defined as
<b>G</b>	General audience
<b>PG</b>	Parental Guidance suggested
<b>PG-13</b>	Parents strongly cautioned
<b>R</b>	Restricted
<b>NC-17</b>	No one 17 and under permitted
<b>X</b>	A rating that has now been superseded by NC-17

## Canadian English Ratings

Rating	Defined as
<b>C</b>	Children
<b>C8+</b>	Children 8 years and older
<b>G</b>	General programming that is suitable for all audiences
<b>PG</b>	Parental Guidance
<b>14+</b>	Viewers 14 years and older
<b>18+</b>	Adult Programming

## Canadian French Ratings

Rating	Defined as
<b>G</b>	General (appropriate for all ages and must contain little to no violence or sexual content)
<b>8ans+</b>	General but inadvisable for young children(could contain scenes disturbing to children under eight). Recommended for viewing with parent.
<b>13ans+</b>	Programming is appropriate for children 13 and older and may contain moderate violence, language and some sexual situations.
<b>16ans+</b>	Recommended for children 16 and older and may contain strong violence, language and sexual content.
<b>18ans+</b>	Programming intended for viewers that are 18 and older. Programming may contain extreme violence and graphic sexual content/pornography.

### NOTE

- All ratings that are higher than those you select are also blocked. For example, if you choose to block the PG-13 rating, then the higher ratings (R and NC-17) are automatically blocked too.

## Open V-Chip

Turn this On to automatically block programs based on the US rating.

## Block Unrated

Block or unblock unrated movies.

# Advanced TV Settings

---

## Getting familiar with the Home screen

The simple design of the **Home** screen menu makes it easy to navigate. It serves as the central location to access **Notifications**, **Apps**, **LiveTV**, **Inputs**, **Media** and **Settings** on the back of the TV that you've connected external devices to.

To access the Home screen, press the [] button on your remote control and use the arrows on the D-pad to make your selection.

### Indicators and Icons on the top of the Home screen

You can always view the current time in the top left corner of the Home screen.

If your TV is connected to the Internet through a wireless connection, then an icon  will display in the top right corner of the screen. This location makes it very convenient for you to determine if you still have Internet connectivity as you use the TV.

### Names of sections that appear on the Home screen

The Home screen displays the following section names:

- **Notifications**
- **Apps**
- **LiveTV**
- **Inputs**
- **Media**
- **Settings**

## Notifications

If your TV is connected to an external device, the screen will be prompted.

## Apps

Numerous factory-installed apps are available for you to choose from for your entertainment preferences.

### Installing an App

- To install an app from the **AppsNOW / VEWD**:
  1. From the Home screen, click on the **Apps** to select the **AppsNOW / VEWD** icon.
  2. Use the navigation buttons on your remote to select the app that you want to install.
  3. Press the **[OK]** button on your remote.
- To install an app from the **SearchNOW / VEWD**:

Even though your TV has numerous factory-installed apps, there may be others that you'd like to download.

1. From the Home screen, click on the **Apps** to select the **SearchNOW / VEWD** icon.
2. Begin typing the name of the app. As you begin typing the first two to three letters the SearchNOW / VEWD suggests words to quicken your search time.
3. Use the navigation buttons of your remote to select the app. A page displays that shows a written description of the app.
4. Click on **Install**.

### Removing an App

You can only delete apps that you've installed to the TV. Some factory-installed apps can not be deleted.

To delete an app:

1. Use the navigation buttons on your remote to select the app that you want to remove.
2. Press the **[red]** button on your remote. A dialog message displays that asks if you're sure you want to remove the app.
3. Click on **Uninstall**. The icon is removed from the Apps list.

#### NOTE

- If an app is deleted, the information related to that app is also removed.

### Moving App Icons around

Apps can not be moved around on the screen.

### Customizing the name of your TV

If you have several TV's in your home then you may want to customize the name of your TV. By giving your TV a name, it will make it easier for you to identify it when connecting devices to the TV to stream or mirror content.

To customize the name of your TV:

1. Press the **[≡]** button on your remote.
2. Press the **[v]** button on the D-pad to select **Settings**, press **[OK]** button to enter the Settings menu.
3. Go to **System > Advanced Settings > TV Name**.
4. Select **User Input** to bring up the keyboard and begin typing the name.
5. When you are finished, power off the TV and power it back on for the change to take effect.

## Media

Media is a central location for you to view or listen to different types of content (for example, your photos, music and movies) through the following methods:

- A USB thumb drive or hard drive
- Compatible mobile phone, tablet or other personal device: You can stream movies, music and photos that are stored on Compatible personal device and play or view the content on your TV.

### Panels that appear on the Media screen

The Media screen displays four panels: **All**, **Photo**, **Music** and **Video**.

### File formats that may be supported

#### NOTE

- Due to differences in programming tools and other factors, some of the file formats that are listed may or may not be supported.

Medium	File Format
<b>Video</b>	.avi (MPEG2, Divx), .mkv (Divx), .mpeg (MPEG2), .wmv (Divx, XviD)
<b>Picture</b>	.JPG
<b>Music</b>	.mp3

### Browsing Content

To browse through content based on the type that you wish to access:

1. You can find the file by Search. Navigate to the appropriate menu tab on the screen and select **All**, **Photo**, **Music** and **Video**, you can also find the file you want through the file type: **Name**, **Date Modified**, **Size**.
2. Click on the name of the folder that contains your content.
3. Make your selection to play or view the content.

If you want to close out of the Media center, then press the **[EXIT]** or **[BACK]** button on your remote.

### Viewing Pictures as a Slideshow

To view pictures in a slideshow:

1. Navigate to the Picture tab.
2. Click on start the Slideshow.

The slideshow of your pictures begins to play. To stop the slideshow, press the **[OK]** button on your remote and press it again to restart it.

### Viewing Video

To stop or restart the video, you can press the **[OK]** button on your remote. You can use the navigation buttons of your remote to control the video.

## Using Anyview Cast to mirror content from your device to the TV screen

The Anyview Cast is an app that enables you to share (or cast) a video, audio or image from your Android-based device to the TV.

### From your tablet or phone

To mirror content from your tablet or phone to the TV:

1. Press the [  ] button on your remote, press the [  ] button on the D-pad to select **Settings**, press [OK] button to enter the Settings menu. Go to **Network > Network Configuration** and select **Wireless**.
2. Press the [ **INPUT** ] button on your remote and select the **Anyview Cast**.
3. Turn on the wireless display function on your Android-based device.

#### NOTE

- Some Android-based devices may not support casting.
4. Find your TV in the list of devices that displays and select it.
  5. Wait for the Creating Connection progress bar to complete on the TV screen and the video or image will display in a moment.

## Software updates for your TV

The software (also referred to as firmware) is part of what powers your TV. We will provide software updates to continuously enhance your TV and correct any issues that may impact your user experience; therefore, we recommend that you keep your TV connected to the Internet to receive updates when they are available.

You can choose to receive updates manually or check for software updates and install them manually.

### Checking for the latest software

To manually check for the latest firmware:

1. Using your remote, press the [≡] button.
2. Press the [v] button on the D-pad to select **Settings**, press [OK] button to enter the Settings menu.
3. Go to **Support > Check Software Update**.

## Quick Problem-Solving Tips

When you experience an issue with your TV, turn it off and on again. If this does not resolve the problem, then refer to the tips below. If the problem is still not resolved, then contact us.

ISSUES	POSSIBLE SOLUTIONS
No sound or picture	<ul style="list-style-type: none"> <li>• Check if the power cord is plugged into a powered AC outlet.</li> <li>• Press the [  ] button on the remote control to activate the unit from 'Standby' mode.</li> <li>• Check to see if the LED light is on or not. If it is, then the TV is receiving power.</li> </ul>
I have connected an external source to my TV and I get no picture and/or sound	<ul style="list-style-type: none"> <li>• Check for the correct output connection on the external source and for the correct input connection on the TV.</li> <li>• Make sure you have made the correct selection for the input mode for the incoming signal.</li> </ul>
When I turn on my TV, there is a delay for a few seconds before the picture appears. Is this normal?	<ul style="list-style-type: none"> <li>• Yes, this is normal. The TV is initializing and searching for previous setting information.</li> </ul>
The picture is normal but there is no sound	<ul style="list-style-type: none"> <li>• Check the volume settings.</li> <li>• Check if 'Mute' mode is set to On.</li> </ul>
Sound but no picture or black and white picture	<ul style="list-style-type: none"> <li>• If the picture is black and white, unplug the TV from the AC outlet and replug it after 60 seconds.</li> <li>• Check that the Color is set to 50 or higher.</li> <li>• Try different TV channels.</li> </ul>
The sound and/or picture is distorted or appears wavy	<ul style="list-style-type: none"> <li>• An electric appliance may be affecting the TV. Turn off any appliances that are nearby and move it farther away from the TV.</li> <li>• Insert the power plug of the TV set into another power outlet.</li> </ul>
The sound and picture is blurry or cuts out	<ul style="list-style-type: none"> <li>• If using an external antenna, check the direction, position and connection of the antenna.</li> <li>• Adjust the direction of your antenna or reset or fine tune the channel.</li> </ul>
A horizontal or vertical stripe appears on the picture and/or the picture is shaking	<ul style="list-style-type: none"> <li>• Check if there is an appliance or electric tool nearby that is causing interference.</li> </ul>
The plastic cabinet makes a "clicking" type of sound	<ul style="list-style-type: none"> <li>• The 'click' sound can occur when the temperature of the television changes. This change causes the television cabinet to expand or contract, which makes the sound. This is normal and the TV is OK.</li> </ul>
The remote control does not work	<ul style="list-style-type: none"> <li>• Confirm that TV still has power and is operational.</li> <li>• Change the batteries in the remote control.</li> <li>• Check if the batteries are correctly installed.</li> </ul>

### NOTE

- For usage in Mexico, operation of this equipment is subject to the following two conditions: 1) it is possible that this device doesn't cause any detrimental interference and 2) this device must take any kind of interference, including that which may cause its malfunctioning.
