U9F Series 4K UHD Android Smart TV

Model # 75U9F

The Ultra TV

If you're looking for the most natural image with rich, vivid colors to match, you're looking at the Hisense U9F with Quantum Dot Wide Color Gamut. At the heart of the U9F is Hisense's exclusive ULED technologies including our Hi-View chipset. These all work together to create backlight control, and PQ enhancing and tuning algorithms to boost color, contrast, brightness and motion. ULED is built to create the Ultra viewing experience with sophisticated processes that fine-tune multiple areas of picture quality to achieve the best performance.

With Quantum Dot Wide Color Gamut technology, colors come to life before your eyes. Quantum Dot technology ensures that every color—more than a billion of them—looks as real as it gets. When combined, these two technologies unleash a whole new world of color and wonder in the native 120Hz panel.

The display (which is up to 2000 nits peak) beams brilliantly. And the intricate local dimming options are packed with over 1000 active backlight zones- the power to control which areas of the display illuminate and which dim more than others.

The U9F also accommodates Dolby Vision® HDR and HDR10 by enhancing color depth and details.

The best in brightness, color, contrast and motion—all available in one magnificent package. Designed and crafted around innovation, it is no surprise that the U9F is our most impressive TV of all classes.

ULED

The picture quality of the U9F is driven by our exclusive ULED technologies which drives the PQ enhancing algorithms to boost color, contrast, brightness and motion. All are calibrated to work together in perfect harmony—to upgrade the performance of every pixel and create a picture that transforms your favorite entertainment into your Ultra-new reality.

Local Dimming and Brightness

Full Array Local Dimming technology makes the U9F shine brighter. Over 1,000 zones offer supreme contrast control for impeccable image detail. More zones mean more influence over performance and the U9 takes full advantage. Instead of appearing washed out, characters in sun-drenched settings stand out. And shadowy figures are easily distinguishable against moonlit scenes.

Android TV

With Android TV, you can enjoy the best Android has to offer on the biggest screen in your home. Stream more than 500,000 shows and movies, and access popular apps like Netflix, Hulu, YouTube and many more. Watch live sports and news from popular channels. Or gather around to watch the hottest videos from YouTube or 1,000+ Chromecast capable apps. What you want. How you want it. It's all on your U9F, on your terms.

AI

The U9F features a powerful AI technology that delivers intelligent picture and audio quality by using algorithms to ensure the optimal viewing and listening experience. This incredibly smart feature continually and intuitively adjusts the areas that matter most to create amazing video and sound. Just plug it in. Turn it on. And don't give it a second thought.

Quantum Dot

Quantum Dot is a feat of engineering that inspires even greater leaps of imagination. By maximizing color accuracy, this technology further enriches over a billion colors unleashed by our Wide Color Gamut feature. On the U9F, oceans sparkle bluer. Fiery reds burn hotter. The grass is always greener. And all those colors in between? Well, they appear even realer. How's that for awe inspiring?

Dolby Vision® HDR & HDR10

With Dolby Vision®, you'll experience content exactly as its creators intended. It optimizes color, contrast and brightness—shot-by-shot, scene by scene—to deliver a level of depth normally reserved for the theater, straight into your home.

Google Assistant

The built-in Google Assistant™ can do almost anything with just one ask. Voice control can be used to turn on the TV or your lights and control compatible devices* from anywhere within earshot. Discover and play your favorite songs or movies. Or, just as easily, get answers about weather, traffic, sports scores, and select shows. Check your calendar or control your home and adjust the thermostat or the front door.

Design

The U9F represents the height of design. While eyes are naturally drawn to the sharp and colorful display, it's impossible to ignore how harmonious the metal accents and ultra-sleek frame makes the TV fit against a wall or on a stand. Or how easily 4K gaming systems and other accessories connect. Even the speakers are strategically placed to maximize sound distribution. The U9F Series is an art form in itself.
