U6G1 Series Quantum Hisense Google TV

Model 50U6G1

## 4K ULED

We're bringing Quantum Dot Color to the people. Enjoy over one billion colors, without worrying about how many commas are on the price tag. You're welcome. The U6G1 also has 4K resolution, Dolby Vision HDR and Full Array Local Dimming Zones. Sounds like science, looks like a way more expensive set. Especially with a quad-core processor managing all the algorithms that add up to more colors, more precision and more oohhhh.

Hey Google. Google TV™ opens the door to more than 700,000 movies and shows, plus video streaming from Netflix, Prime Video, Disney+, Hulu, YouTube and more. All available using your voice as the remote control. No need to press buttons on the actual remote. Google TV™ also comes with Google Assistant, so you can find the latest blockbuster, check the score of the big game and even dim the lights\* without leaving what you're watching. The U6G1. It's the best of TV, instantly.

### 4K ULED™

Like great, but better. The U6G1 has our exclusive ULED technologies. They boost color, contrast, brightness, motion... we could go on. It's the TV your old TV wants to be.

### Quantum Dot Wide Color Gamut

See over one billion shades. Quantum Dot produces purer, richer, more brilliant and accurate colors than a regular LCD TV. We could get into the science. But it's a lot easier to say it makes every day look like the 4<sup>th</sup> of July.

### Dolby Vision™ • Dolby Atmos®

Dolby Vision HDR picture and Dolby Atmos sound are cinema technology for your home. They provide amazing realism you can see and hear in every scene.

### Peak Brightness/Full Array Local Dimming Zones

Let's start with the science. The higher the nit rating, the brighter the screen. Most laptops are between 200-300 nits. Anything over 500 nits is extremely good. This is 600 nits peak brightness across 60 local dimming zones. You get the picture. A picture that's brighter and perfectly lit in any light condition.

### FilmMaker Mode

This technology is a collaboration between film-makers, Hollywood studios, consumer electronics companies and the UHD Alliance. By disabling all post-processing and preserving correct aspect ratios, colors and frame rates, Filmmaker Mode displays content exactly as it was intended by the filmmakers.

### Google Assistant

Press the Google Assistant button on your remote to do more on your TV with your voice. Ask Google to search for the latest blockbuster, stream shows, or open multiplayer games. Have it dim the lights by connecting smart home devices. Manage tasks and see your calendar. Or ask it questions and see the answers on your TV.

### Voice Remote

With the voice remote, you can open apps, adjust the volume, and search for your favorite shows using your voice. Just press the Google Assistant button on your remote to talk to Google.

### Works with Alexa

The U6G1 works with Alexa through any of your Alexa-enabled devices. Just ask Alexa to switch the TV on or off, change channels and lots more.

\*Google Assistant-compatible products required to use voice commands

\*HDR viewing experience will vary by model, content availability and internet connection.

## TECHNICAL SPECIFICATIONS

DIMENSIONS/WEIGHT	
TV Dimensions(without the stand)	43.9×25.4×3.0 inches 1116×646×76 mm
