Using the E-Manual

View the embedded E-Manual that contains information about your TV's key features.

Disclaimer:
Instructions and images through this manual are only for reference and may differ from the actual product.

Launch the E-Manual

Press button on your remote control to select Settings > System > Advanced System > E-Manual.
Scan the QR Code with your Smart Phone to open the E-Manual on your device.

Note:
- The black background icon stands for the button on the remote control.
- The grey background icon stands for the icons on the TV screen for selecting.

Use the Buttons in the E-Manual

Search
You can use icon on the top of the E-Manual to search for the product feature information, and the E-Manual will provide all the titles and content that contains the search information.

Setting
You can use icon on the top of the E-Manual home screen to adjust the text size.

Home Screen

All TV functions can be accessed from the Home screen.

Display the Home Screen

Press button on your remote control to enter the Home screen.
To exit the Home screen, use your remote control or use the navigation buttons on the screen to move the cursor to other icons, press button to enter and select your desired service.

Connecting to the Internet

To get access to the Internet using a wired connection or connecting to an available wireless network.

Connect to a Wired (Ethernet) Network

To get access to the Internet using a wired connection, it is recommended to use a modem or router that supports Dynamic Host Configuration Protocol (DHCP). Modems and routers that support DHCP automatically provide the IP address, subnet mask, gateway, and DNS, so you do not have to enter them manually. Most home networks already have DHCP.
See the illustration below.
After connecting to a wired (Ethernet) network:

Press button on your remote control to select Settings > Network & Internet.

Go to ETHERNET section, and set the TV network by pressing button to enter the submenu.

- **Connection Type**
  Show whether the Ethernet is connected.

- **Proxy settings**
  You can set the proxy server.

- **IP settings**
  Configure the IP setting for your network connection.

**Related information**

- [Network & Internet](#) on page 35
- [Network Issues](#) on page 55
- [My TV cannot connect to the network.](#) on page 50

### Connect to a Wireless Network

To connect to an available wireless network, make sure that you turn on your wireless router and have the wireless router's SSID and password before attempting to connect.

To get access to the Internet using a wireless connection:

Press button on your remote control to select Settings > Network & Internet > Wi-Fi.

To get access to the Internet in a wireless way:

1. Turn on your Wi-Fi.
2. The list of networks will display automatically.
3. Select a wireless network from the list, and input the password.
4. If the network connection does not appear in the list, select See all to display all the list, or select Add new network to input a wireless network name, select the type of security mode, and enter password.
First-Time Use

Internet Related Features

- Content Sharing
  To view media content, like videos, music or photos saved in your Android/iOS/PC device on your TV screen. For more information, please refer to Benefits of Smart TV > Content Sharing in this manual.

- Sharing your Smart Phone/Computer Screen on the TV
  To mirror your mobile device or computer screen to the TV. For more information, please refer to Connecting to External Devices > Sharing your Smart Phone/Computer Screen on the TV in this manual.

Prepare Live TV

Connect antenna/cable to the TV

1. **ANT** > TV
2. Press button on your remote control to select Settings > Channels & Inputs > Channels > Auto Channel Scan/Manual Scan.

Note:
- TV jacks may vary and antenna/cable function may not be applicable in some models/countries/regions.
- You may also connect devices that can receive broadcast signals such as a Set Top Box.

Start auto scan or manual scan

1. **ANT** > TV
2. Press button on your remote control to select Settings > Channels & Inputs > Channels > Auto Channel Scan/Manual Scan.

Related information
Channel Scan on page 7

Using External Devices

Switch between external devices connected to the TV

1. Press button on your remote control.
2. Select your desired input source.

Edit the name of input sources

1. Press button on your remote control.
2. Press ▶ button to rename input.

Note:

- Maximum name length is 36 characters.

**Recommended Topics**

**Install an App**

Install apps from App Store for your entertainment preferences. For more information, please refer to Benefits of Smart TV > Using Apps > Install an App in this manual.

**Picture**

Adjust picture mode and other advanced picture settings. For more information, please refer to Settings Overview > Picture in this manual.

**Screen**

Change the picture size and use the overscan function. For more information, please refer to Settings Overview > Screen in this manual.

**Sound**

Adjust sound mode and other advanced sound settings. For more information, please refer to Settings Overview > Sound in this manual.

**Audio Output**

Select speakers and adjust the audio output settings. For more information, please refer to Settings Overview > Audio Output in this manual.

**Keep the TV updated**

Set your TV to receive the latest firmware. For more information, please refer to Settings Overview > Support > System Update in this manual.
Enjoy Live TV

Channel Scan

You can scan for channels automatically or manually.

Note:

• Antenna/cable function may not be applicable in some models/countries/regions.

Auto Channel Scan

Automatically scan for channels to view programs from your TV source.

> TV

If no TV channels were saved before, you will be prompted to do a channel search.

In Live TV, > Channels > Auto Channel Scan

Before you select Auto Channel Scan, you can press > Channels > Tuner Mode to select Antenna or Cable.

Manual Scan

In Live TV, > Channels > Manual Scan

Type in a channel to add it manually to your TV.

Live Menu

You can obtain quick access to the channel list, favorite channel list or use relevant features with ease when watching TV programs.

Display Channel List

In Live TV, press button on the remote control to display the Channel List menu.

Learn about channel list sub-menu.

In Live TV, >

Display Favorite Channel List

In Live TV, press \( \text{OK} \) > \( \text{OK} \) > \( \text{OK} \) to select **FAV**, and press \( \text{OK} \) button to display the favorite list.

Note:
- These steps should be operated under TV inputs.

Related information
Edit Favorite Channel List on page 10

Channel Edit

Manually edit the channel list or favorite channel list to your preference.

Edit Channel List

Before you can edit the channel list, Channel Scan must be completed first.
Manage the Channels
In Live TV, press OK > to select a Live TV channel category such as Antenna or Cable, then use D-pad to select Edit.

- Delete:
  1. Select the channel you want to delete, or press OK to select more channels.
  2. Press button to delete.

- Restore: Press button to display the colour menu and select RED to enter the list of deleted channels. Press button to restore the deleted channel.
Edit Favorite Channel List

Before you can edit the favorite list, Channel Scan must be completed first.

Add a channel to a favorite list

You can add channels from various reception types to the favorite list.

1. In Live TV, press OK button to display the channel list.
2. Press button, select the channel(s) you want to add to the favorite list by pressing OK button.
3. Press button to select Add to Favorite.
4. Press OK button to confirm.
5. Then a heart-shape icon will appear next to the added channel.

Move or remove channels in a favorite list

If you want to remove favorite channels:

1. In Live TV, press OK > > to select FAV, and press OK button to display the favorite list.
2. Press , select the channel(s) you want to delete to the favorite list by pressing OK button.
3. Press button to select Delete Fav. Channel.
4. Press \[O\] button to confirm.
5. Then the channel you select will disappear on the FAV list.

Note:
- These steps should be operated under TV inputs.
- Before you edit the favorite lists, complete channel scan first.

Benefits of Smart TV

Using a Google Account

Sign in with Google to get apps, Google Assistant, and personalized recommendations.

Signing into an account

When you turn on the TV for the first time, you can select Set up Google TV to sign into a Google Account by the setup guide, if you select Set up basic TV, you can also set it later by pressing to select Set up Google TV.

- Set up with the Google Home app
- Set up on TV instead

Before signing into your Google account, make sure your TV is connected to the network. For more about network settings, please refer to Connect to a Wired (Ethernet) Network or Connect to a Wireless Network in this manual, after the network is connected, enter your E-mail/phone and password, select Sign In.

Adding a kid account

You can create a personalized space for your kid with access to content they love and tools to help keep you in control.

1. After the network is connected, > Settings > Accounts & sign-in > Add a kid.
2. Set up Google TV for a kid in your family, you can do the same for more kids later.

Adding another account

You can use other accounts within Google apps like YouTube, but you won't see recommendations for those accounts on the Google TV home screen.

Before creating a new account, make sure your TV is connected to the network. For more about network settings, please refer to Connect to a Wired (Ethernet) Network or Connect to a Wireless Network in this manual.

1. After the network is connected, > Settings > Accounts & Sign-in > Add another account.
2. Enter E-mail/phone and password.
3. Press OK.

Using Voice Control

Set up voice assistant to control your TV just by your voice.

Google Voice Setup

Voice Control may not be applicable in some models/countries/regions.

Google Assistant

You can ask for information, search for your favorite movies, control your TV and more, just by asking Google Assistant.

Before setting up Google Assistant, connect your TV to the network and sign in your Google account.

How to start Google Assistant

You can choose this way to start Google Assistant:
Benefits of Smart TV

- Press button on your remote control.

Note:
- To start Google Assistant, you need to pair the remote first.
- The Google Assistant function may not be applicable in some models/countries/regions.
- The setup steps above may vary depending on actual products.

Hands-free Voice Control

Google Assistant can answer your questions or help you change TV configuration.

Before using this function, connect the TV to the Internet and sign in your Google account by pressing and selecting Settings > Accounts & Sign In.

Note:
- Hands-free Voice Control may not be applicable in some models/countries/regions.

How to set up Hands-free Voice Control

1. Switch the control button on the bottom of the TV to to turn on the microphone.
2. Pair the remote first, press button to select "Yes, I'm in".
3. Start a conversation by saying "Hey Google", and the dialog bar appears at the top of the TV screen. At the same time, indicator lights illuminate.
4. Continue speaking, such as "What's the weather" or "volume up".

Screenless mode

Settings > System > Advanced System > Screenless Mode

Talk to Google Assistant when the screen is off.

In Screenless Mode, Google Assistant is always available to help even when the screen is not on. Just say "Hey Google".

This feature will affect standby power consumption. To turn it off, press button, select Settings > System > Advanced System > Screenless Mode.

Note:
- Google Assistant and some features are available on limited country/region/language.
- Screenless mode is only for models with far-field Google Assistant.

Alexa Setup

Set up to control your TV with any Alexa-enabled devices. Alexa can help you change the TV configuration. Using just your voice, you can change inputs, volume, channels, and more. Just ask Alexa.

What is required to control your TV with Amazon Alexa?

- Android TV models that support the Alexa skill.
- Amazon Echo device or Alexa App.
- Amazon account for Alexa App or Echo device, if you don't have the account, please create one before the setup process.
- Hisense account to link your TV, you can create it before the setup process or in the period.
Benefits of Smart TV

• Home network with Wi-Fi capabilities.
• For issues of accessing your Amazon account and using the Alexa app during setup, please visit amazon.com for help.

How to set up Alexa

1. Press 🎮, select Settings > System > Advanced System > Amazon Alexa Service.
2. Select Set up now.
3. Link the TV to Hisense account. Scan the QR code with your phone, or visit the website on your phone or computer, sign in your Hisense account, and enter the code showed on the TV. The webpage and code will be expired after 15 minutes.
4. Next, your TV screen shows a list of TV name. Select one from it or enter a custom name. Then, your TV will appear in the device name list on your phone or computer.
5. Download the Alexa app on your smart phone. Open the app and sign in with your Amazon account.
6. In the Alexa app, select Skills section, search and enable Hisense Smart TV skill. Follow the instructions to link your Amazon account by entering the same Hisense account that you've signed on your TV.
7. On your TV, select Skill enabled and Done.
8. Now you can ask Alexa try some functions available for TV.

Note:
• Use external Alexa-enabled devices (e.g. Alexa App, Echo) to control your smart TV by using just your voice.
• After your Hisense account is created but you can't see the Link your TV step on your phone or computer, please sign out account and re-visit URL and sign in again.
• If you do not see "Amazon Alexa Service" in the System settings, then your TV does not support Alexa.
• The Alexa function may not be applicable in some models/countries/regions.
• The setup steps above may vary depending on actual products.

Voice Service Other Issues

If you want to turn on your TV with Alexa-enabled devices (e.g. Echo, Echo show) or Google Home devices (e.g. Google Home, Google Nest Hub), please:

1. Turn on Screenless Mode at 🎮 > Settings > System > Advanced System.
2. Make sure your TV and Alexa-enabled devices/Google Home devices are connected to the same network environment.

Note:
• Only Alexa (Alexa skill is enabled) and Google Smart Home Service support turning on your TV with Alexa Echo or Google Home.
• This function may not be applicable in some models/countries/regions.

Content Sharing

Content Sharing allows you to view media content, like videos, music or photos saved in your Android/iOS/PC device on your TV screen.
Benefits of Smart TV

Share Media Content from your Device

1. Connect your TV and Android/iOS/PC device to the same network.
2. Turn on Content Sharing at \( \mathcal{O} > \text{Settings} > \text{System} > \text{Advanced System} > \text{Content Sharing}. \)
3. Turn on the content sharing function in your Android/iOS/PC device.
4. Find the TV name in the search list of your device and select it. Wait for the connection progress to complete.
5. On your Android/iOS/PC device, choose the media content you want to share on your TV.

Play Media Content from your Device on the TV

You can connect media content saved in your Android/iOS/PC device to your local network and play the content on your TV.

1. Connect your TV and Android/iOS/PC device to the same network.
2. Turn on Content Sharing at \( \mathcal{O} > \text{Settings} > \text{System} > \text{Advanced System} > \text{Content Sharing}. \)
3. Make sure your media content in your Android/iOS/PC device are visible through the local network.
4. On your TV, select a device with media content at \( \mathcal{O} > \text{Settings} > \text{Apps} > \text{MediaCenter}, \) or \( \mathcal{O} > \text{Your apps} > \text{MediaCenter}. \) The media content list in your Android/iOS/PC device appears.
5. Select a media content item from the list to play.

Note:
- Content may not be played depending on the file format.
- Content may not be played smoothly, or the function may not work properly due to the network condition.

Using Apps

\( \mathcal{O} > \text{Apps} \)

From the Apps screen, there are many recommended apps for you, you can find your favorites and use them very easily.

You can find popular apps by App categories, other devices, etc.

Numerous factory-installed apps are available for you to choose for your entertainment preferences.
Benefits of Smart TV

Install an App

Even though your TV has numerous factory-installed apps, there may be others that you would like to download.

To install an app:

1. From the Apps screen, you can use the search box to search for your apps and games that you want to install.
2. Select the Install. The selected app is installed on the TV.

Note:
- To use this function, your TV must be connected to the Internet.
- Adding apps is free, but it might cost you money when using some apps.

Manage Apps

To move an app:

1. From the Apps screen, use the navigation buttons on your remote control to select the app that you want to move. Long press OK button.
2. Select Move.
3. Use the navigation buttons on your remote control to move the location of the app. Press OK button to confirm.
4. Press button to finish.

Remove an App

You can only delete apps that you've installed to the TV. Factory-installed apps can not be deleted.

To delete an app:

1. From the Apps screen, use the D-pad on your remote control to select the app that you want to remove. Long press OK button and select view details.
2. Select Uninstall.
3. A dialog message displays that asks "Do you want to uninstall this app?". Confirm OK and the app will be removed from all users on the device.

Note:
- If you don't find the app that you want to remove on the home page, you can press > Settings > Apps > See all apps.

Apps Settings and Permissions

You can find all the apps on the TV at > Settings > Apps > See all apps.

Select the app, you can see the app's Version, Storage used, or you can Open, Uninstall/Force stop, Uninstall updates, Disable, etc.

Clear data

> Settings > Apps, select the app, then select Clear data.
Benefits of Smart TV

All this app's data will be deleted permanently. This includes all files, settings, accounts, databases, etc.

**Clear cache**
Clear cache of applications and system.

**Clear defaults**
Clear defaults for apps.

**Permissions**
You can turn on or off the Location, and if you turn on Remove permissions if app isn't used, you can protect your data, permissions for this app will be removed if the app is unused for a few months.
Connecting to External Devices

Remote & Accessories
Connect remote controls or other accessories, such as keyboard, mouse and gamepad, to interact with your Smart TV easily.

Connect Remote Control
Pair the Bluetooth remote control with the TV.

1. To pair the Bluetooth remote control to the TV after you power the TV on for the first time, there will be instructions on how to pair the remote control.

2. If your remote control fails to pair with TV, keep the remote control within 10 feet (304.8 cm) from the TV, hold and at the same time at least 3 seconds to start pairing until you see the light pulsing on the remote control.

Note:

• If your remote control fails to pair with TV, check the Bluetooth is set On by pressing button to select Settings > Remotes & Accessories > Bluetooth to On.

• This function may not be applicable in some models/countries/regions.

• If an error occurred while trying to pair the remote control, it could have been caused by interference. Try to remove what is causing the interference and try pairing again.

• If an error occurred with the remote control while using sufficiently charged batteries, you can take out the batteries for 1~2 seconds then insert them back again. Now the remote control will work normally.

• The remote control cannot be paired to the TV while the TV is in standby mode.

Use HDMI&CCEC
Use the TV’s remote to control external devices that are connected to the TV by an HDMI cable. The external devices need to support HDMI&CCEC function.

Connecting an external device through HDMI&CCEC function
Press button to select Settings > Channels & Inputs > Inputs > HDMI control.

1. Set HDMI control to On.

2. Connect an HDMI&CCEC compliant device to the TV.

3. Turn on the connected external device. The device is automatically connected to the TV. After connection is finished, you can access the menu of the connected device on your TV screen using your TV remote control and control the device.

Enabling device auto power off
Press button to select Settings > Channels & Inputs > Inputs > Device auto power off.

Set to On to turn off CEC compatible external devices when the TV is turned off.

Enabling TV auto power on
Press button to select Settings > Channels & Inputs > Inputs > TV auto power on.

Set to On to turn on the TV when CEC compatible external devices is turned on.
Connecting to External Devices

HDMI format function

In HDMI source, press \( \text{button to select HDMI Format.} \)

Please select Enhanced format if your HDMI device supports 4K HDR. If it does not support 4K HDR, please select Standard format.

Note:

- HDMI cables must be used to connect HDMI & CEC compatible devices to your TV.
- The HDMI & CEC feature of the connected device must be turned on.
- If you connect an HDMI device that is not HDMI & CEC compatible, all the HDMI & CEC control features do not work.
- Depending on the connected HDMI device, the HDMI & CEC control feature may not work.
- The HDMI & CEC feature supports One Touch Play, Routing Control, System Standby, Device OSD Name Transfer, Remote Control Pass Through, Give Device Power Status, System Audio Control.

Related information
HDMI & CEC Issues on page 57

Control the TV with a Keyboard, Mouse or Gamepad

Connect a keyboard, mouse or gamepad to control your TV easily.

Connect a USB keyboard, mouse or gamepad
Plug the keyboard, mouse or gamepad cable into the USB port of your TV.

Connect a Bluetooth keyboard, mouse or gamepad
Find the Bluetooth device name in Settings > Remotes & Accessories and select it.

Note:

- Keyboard, mouse, or gamepad connected via USB or Bluetooth technology may not be usable with some Apps.
- Bluetooth function may not be supported depending on the models/countries/regions.
- For more information about how to connect a Bluetooth device, refer to the Bluetooth device's user manual.

Related information
Connecting a Bluetooth Device on page 20

Connecting Bluetooth Devices

You can connect to devices using Bluetooth technology.

Turn on Bluetooth Feature on your TV

Press \( \text{button to select Settings > Remotes & Accessories > Bluetooth Visibility to On.} \)

Connecting a Bluetooth Device

To pair a Bluetooth device, such as Bluetooth headphones, speakers, keyboards, mouse or even mobile devices:
Connecting to External Devices

1. Before pairing your Bluetooth devices, make sure they're in pairing mode and put devices within range of the TV. To put your Bluetooth devices in pairing mode, refer to the user manual of devices.

2. Press button to select **Settings > Remotes & Accessories > Pair accessory** to put the TV in pairing mode. A list of available Bluetooth devices will be displayed.

3. Select the desired device from the list, then follow the onscreen instructions. If you are prompted to enter a passcode, refer to the user manual of the device. After pairing is completed, the device is connected and is stored to the TV.

   **Note:**
   - You need to unpair a paired device first if the maximum number of paired devices was reached.

   **Note:**
   - One Bluetooth speaker or Bluetooth headphone can be connected to the TV all the time, also you can select HeadPhone Only.
   - Some compatibility issues may occur depending on the Bluetooth device support.
   - Bluetooth keyboards may not be functional with some applications.
   - The TV and Bluetooth devices may become disconnected if the distance between them is too long.
   - This function may not be applicable in some models/countries/regions.

**Related information**

Using AirPlay and HomeKit

Using AirPlay

Use AirPlay to wirelessly share audio and video content from your iPhone, iPad, or Mac to your TV. Stream music and videos, share your photos, or mirror exactly what’s on your device’s screen.

AirPlay is a source in Inputs. Press the button on your remote control to show the input list, then select AirPlay to enter AirPlay. Then you can select AirPlay and HomeKit Settings. You can also find AirPlay and HomeKit settings in system settings on your TV.

How to use AirPlay:

1. Make sure your Apple device is connected to the same network as your TV.
2. Locate the AirPlay icon on supported media apps, or the Screen Mirroring icon in Control Center on your Apple device. Depending on the content, these steps may vary:
   - To mirror your device’s screen, open Control Center and tap Screen Mirroring.
   - To stream audio from supported music or podcast apps, tap AirPlay audio.
   - To stream video from supported apps, tap AirPlay video.
3. Select your TV from the list to begin using AirPlay.

Note:
- An AirPlay-enabled TV.
- The TV and Apple devices are connected to the same network.
- The icon is only for reference. In some apps, you may have to tap another icon first.
- If an AirPlay passcode appears on your TV screen, enter the passcode on your Apple device to continue.

Using HomeKit

Use HomeKit to easily and securely control your TV using your Apple devices.

1. To set up HomeKit, open AirPlay and HomeKit settings on the TV. Locate the HomeKit section and select ‘Set Up’.
Connecting to External Devices

2. The HomeKit setup screen will display a pairing QR code on the TV. Use your iPhone or iPad to scan the QR code, then follow the on-screen directions to complete HomeKit setup.

Note:

• Available operations vary depending on the version of the app and software.

Connecting USB Devices

Connect the USB devices such as hard drives, USB sticks and digital cameras for browsing photos, listening to music.

- Support the USB disk 4G, 8G, 16G, 32G, 64G, 128G and other common market size, and 8T hard drive is currently supported.
- Support format: NTFS, FAT32.
- Certain digital cameras may not be compatible with the TV.

Select the content you want to play or view. For more information, please refer to Entertainment > Media in this manual.

Connecting Headphones

You can connect a pair of headphones (not provided) to the HEADPHONE port on your TV. While the headphone is connected, the sound from the built-in speakers will be disabled.

Note:

• Headphone port may not be available in some models.
• Headphones with microphones are not supported.
• If Headphone with Speakers is selected in Settings > Display & Sound > Audio Output > Headphone Mode, the headphone and the TV will have sound output at the same time.

Connecting to External Devices

Connecting Audio Visual (AV) Devices

Connect with a composite video cable
To connect an AV device with a composite video cable (not provided), see the illustration below.

When the connection is completed, using your remote control, press button and select AV as the input source.

Note:
- AV IN port(s) may vary depending on model type.
- AV IN port(s) may not be available in some models. Please use other port(s) to connect AV devices.

Connect with a HDMI cable
To connect an AV device with a HDMI cable (not provided), see the illustration below.

When the connection is completed, using your remote control, press button, and select the corresponding HDMI input.

Note:
- Some devices, such as DVD players, require the HDMI signal to be set to the correct format in the device settings. Please consult your device user manual for instructions.
- If there is no sound from your TV, configure the device audio settings.

Related information
Use HDMI&CEC on page 19

Connecting Speakers or Other Audio Receivers
To connect speakers or other audio receivers with an audio cable (not provided), see the illustration below.
Connecting to External Devices

Ensure the audio connected devices are switched on before switching on the TV.

When a digital audio system is connected to the DIGITAL AUDIO OUT port, decrease the TV volume, and use your digital audio system to control the volume.

Note:
- If you prefer to use Audio Return Channel/Enhanced Audio Return Channel, please refer to Connecting to External Devices > Connecting a Digital Audio System with ARC in this manual.
- You can connect the DIGITAL AUDIO OUT port on the back of the TV to the optical port on the amplifier. Then go to > Settings > Display & Sound > Audio Output > Digital Audio Out to choose to select Dolby Audio - Dolby Digital to receive the Dolby Digital audio.

Related information
Select Speakers on page 33

Connecting a Digital Audio System with ARC

If you would like to use the Audio Return Channel (ARC) feature to send sound from the TV by a HDMI cable to a digital sound system, you can connect it to the HDMI (ARC) port of your TV.

By using this feature, you can also control the sound system with your TV remote instead of using the remotes for each device.

After the connection:
1. Power on the sound system.
2. Press button on your remote control to select Settings > Display & Sound > Audio Output > Audio Output > ARC.

Note:
- Audio receiver must support ARC function.
- If the device has an Input Selector feature, then make sure to change it to TV.
- When this port is used for ARC function, it can be used as signal input when a DVD is connected to an amplifier and the amplifier is connected to the TV at the same time. Some amplifiers may not support series connection.
- 5.1 CH (channel) audio is available when the TV is connected to an external device that supports 5.1 channel surround sound. You can press button on your remote control to select Settings > Display &
Connecting to External Devices

**Sound > Audio Output > Digital Audio Out** to choose **Dolby Audio - Dolby Digital Plus** to receive the 5.1 channel audio.

### Connecting a PC

You can connect a PC to the TV with a HDMI cable to use your TV as a PC monitor.

After connecting the PC, press button. Select the connected PC as the input source.

![HDMI connection diagram]

**Note:**

- For better image quality, set the PC's resolution, and make sure the resolution is supported by the TV.
- If there is no sound from your TV, change the PC's audio settings.
- If you want to connect your PC and TV wirelessly, please refer to Benefits of Smart TV > Content Sharing or Connecting to External Devices > Sharing your Smart Phone/Computer Screen on the TV in this manual.
Settings Overview

Picture
Adjust picture mode and other advanced picture settings.

Use the Backlight
Press button on your remote control to select Settings > Display & Sound > Picture > Backlight.
You can change the overall brightness of the screen.

• Dynamic Backlight Control (or Local Dimming if support)
  Enable the TV to automatically adjust the backlight by sections according to the changes in the image and increase the contrast.

• Backlight Level
  Adjust the bright you want images to appear, lower settings create darker images.

• Automatic Light Sensor
  Enable the TV to automatically adjust the picture settings according to the amount of ambient light in your room.

• Light Sensor Shift
  Adjust the lower point of the dynamic backlight adjustment scope. This is a money-saving feature because it reduces power consumption.

Note:
• Some functions above may not be applicable in some models/countries/regions.

Related information
Picture Issues on page 54

Choose a picture mode
Press button on your remote control to select Settings > Display & Sound > Picture > Picture Mode.
You can select the picture mode that provides the best viewing experience.

Note:
• Options may differ depending on your model/country/region and the content you are watching. Please refer to the specific product.

When you use a normal signal
If you would like to configure the settings for your picture, then there are some types of picture modes available:

• Vivid
  You can enjoy vivid experience.

• Standard
  Use Standard mode for watching normal content, such as News, Drama or Documentaries.

• Energy Saving
  Energy Saving mode can save energy.
Settings Overview

• **Game**
  Enable Game Mode to optimize the TV's settings to enjoy a better gaming experience with a PC or a game console connected to the TV.

• **Sports**
  Optimized picture for watching sports.

• **Theater Day**
  Theater Day corresponds to the quality effect of different ambient brightness scenes.

• **Theater Night**
  Theater Night corresponds to the quality effect of different ambient brightness scenes.

• **FILMMAKER MODE**
  A picture quality mode.

**Note:**
- The Game mode can't be used in tuner and USB source.

**When you use a HDR signal**
HDR (high dynamic range) can improve the viewing experience with higher contrast and vivid colors. Bright whites look brighter and dark blacks look darker. TV can display a wide range of colors.

**Note:**
- When you use a HDR signal, the picture mode is HDR picture mode.

**When you use a Dolby Vision signal**
Inspired by cinema technology, Dolby Vision is the format that allows your TV to deliver a full range of colors, high dynamic range images, brighter whites and dark blacks using scene-by-scene calibration.

**Note:**
- When you use a Dolby Vision signal, the picture mode is Dolby Vision picture mode.

**Related information**
*Picture Issues* on page 54

**Adjust the picture quality for each picture mode**
Press the button on your remote control to select Settings > Display & Sound > Picture > Contrast/Brightness/Color/Tint/Sharpness.

Choose a picture mode and then adjust the settings.

• **Contrast**
  Adjust the Contrast level to increase or decrease how bright images appear.

• **Brightness**
  Adjust the Brightness level to generate lighter or darker images.

• **Color**
  Adjust the color intensity of the picture for a more vibrant image.

• **Tint**
  Adjust the colors from green to magenta tint to view the natural skin tones of people on the screen.
Settings Overview

• Sharpness
  Adjust how sharp or soft edges of images appear.

Related information

Apply Picture Settings

Press button on your remote control to select Settings > Display & Sound > Picture > Apply Picture Settings.

Adjust current picture mode to apply to all sources (Including both external devices and OTT sources) or just current source.

Related information
Picture Issues on page 54

Configure Advanced Settings

Press button on your remote control to select Settings > Display & Sound > Picture > Advanced Settings.

You can configure picture mode settings that provides the best viewing experience.

• Color Temperature
  Adjust how warm (red) or cool (blue) the white areas of an image appears.

• Motion Enhancement
  Reduce seeing afterimages that are left on the screen when viewing fast-moving objects.
  If you select Custom, you can configure Blur Reduction and Judder Reduction manually.

• Motion Clearness
  Improve how clear the picture appears when viewing.

• Noise Reduction
  Improve how clear the picture appears by reducing noise.

• Digital Noise Reduction
  Improve picture clarity by reducing video noise.

• HDMI Dynamic Range
  Adjust the HDMI signal range to be more suitable for the content. (HDMI mode only)

• Active Contrast
  Automatically darken dark areas and lighten light areas of images to see more details.

• FILMMAKER MODE Auto Detection
  A picture quality mode, which can automatically switch according to the film source if you turn on.

• Enhanced Viewing Angle
  Set to On to optimize your viewing angle, and you will enjoy a better watching experience.

• Color Space
  Change the range of colors the TV displays.

• Instant Game Response
  Refer to Enabling instant game response in this manual.
Settings Overview

- **FreeSync (or PC Sync for some models)**
  Refer to Enabling FreeSync or Enabling PC Sync in this manual.
  This function may not be applicable in some models/countries/regions.
- **Low Blue Light**
  Eye care: reduce the emission of blue light.
  This function may not be applicable in some models/countries/regions.

**Note:**
- Some functions above may not be applicable in some models/countries/regions.

Picture Issues on page 54

Reset the picture settings

Press 🔄 button on your remote control to select Settings > Display & Sound > Picture > Reset.

Reset current picture settings back to the factory setting.

Screen

Change the picture size and use the overscan function.

**Note:**
• This function may vary depending on the version of the software.

Change the Picture Size

Press button on your remote control to select Settings > Display & Sound > Screen > Picture Size.

You can adjust the Aspect Ratio to stretch or zoom in on your picture. You can choose from the following settings: Auto, Normal, Zoom, Wide, Direct, Dot-By-Dot, Panoramic or Cinema, etc.

Related information
Picture Issues on page 54

Use the Overscan function

Change the video size settings to slightly crop the edges of the displayed image.

Sound

Adjust sound mode and other advanced sound settings.

Choose a Sound Mode

Press button on your remote control to select Settings > Display & Sound > Sound > Sound Mode.

You can select a preset sound mode suitable for the content type or the listening environment.

• Standard
  In Standard mode, the TV delivers a flat frequency response, which preserves the natural characteristics of the original sound.

• Theater
  Theater mode increases the surround sound effect and provides a more prominent bass response.

• Sports
  Optimized sound for watching Sports events.

• Music
  In Music mode, low and high frequencies are emphasised to enhance musical instrument reproduction.

• Speech
  In Speech mode, low and high frequencies are attenuated to improve the reproduction and clarity of the human voice.

• Late Night
  In Late Night mode, the TV will improve the reproduction and clarity of the human voice with a low volume level.

Note:

• Auto Mode may not be applicable in some models/countries/regions.
• Sound mode adjustment is only available when you select TV speaker as audio output.

**Power**
You can set Power LED ON or OFF, set Power On Mode to Remember, Standby, On.

**System sounds**
This is a switch for system sounds.

---

**Configure Advanced System Settings**

Press button on your remote control to select Settings > System > Advanced System.

**Screenless Mode**
If your models support Hands-free Voice Control function, you can talk to the Google Assistant even when the screen is off. In screenless Mode, the Google Assistant is always available to help even when the screen is not on. Just say "OK Google/Hey Google". This feature will affect standby power consumption when it is set to On.

**Note:**
- The Google Assistant and some features are available on limited country/region/language.
- This function may not be applicable in some models.

**Wake on Cast**
You can enable or disable Wake on Cast function which is able to remotely wake up the TV through external devices.

**Note:**
Settings Overview

• This function may not be applicable in some models/countries/regions.

Serial/IP Control Port
Our TV supports IP control feature within the local area network (LAN). TV can accept the spec-compliant instructions issued by the device in the same local area network through the pre-defined network interface and command format, like shutdown, volume up/volume down, switch channels, etc.

Note:
• This function may not be applicable in some models/countries/regions.

Control4 Control Port
TV can be compatible with control 4 devices. Control and linkage between devices can be achieved through drivers and protocols provided by Control 4.

Note:
• This function may not be applicable in some models/countries/regions.

Product Registration
Visit https://www.hisense-usa.com/support/register or scan the QR code with another device (cellphone, tablet..) to complete your registration.

Note:
• The website and the QR code may be different in some countries/regions.

E-Manual
Scan QR code to display E-Manual.

Clear Cache
Clear cache of applications and system.

Support
You can set up support settings.

Note:
• The menus displayed vary depending on models/countries/regions.

System message
Press button on your remote control to select Settings > System > Advanced System > Help > System message.
View system message, including: Serial Number, Service Code, Software Version, etc.

Support information
Press button on your remote control to select Settings > System > Advanced System > Help > Support information.
View Support URL, Support Number, Email, etc.
Settings Overview

Signal Information
Press button on your remote control to select Settings > System > Advanced System > Help > Signal Information.
Perform self diagnosis to test Video Format, Audio Format, Color Depth, etc.

Check Software Version
To check the current software version of your TV:
Press button on your remote control to select Settings > System > Advanced System > Help > System message.

System Update
Press button on your remote control to select Settings > System > About > System update.
Set your TV to receive the latest firmware. Provide software updates to continuously enhance your TV and correct any issues that may impact your user experience; therefore, recommend you to keep your TV connected to the Internet to automatically receive updates when they are available.

Set Usage Mode
Set the TV to use in Home or Store mode.

Home Mode
Select Home Mode for normal TV usage.
If you want to switch to Store Mode when the TV is in Home Mode, turn on Store Mode at > Settings > System > Advanced System.

Store Mode
Select Store Mode to setup the TV in a retail setting. This mode enables E-Pos and other demo functions and is only intended for use in retail stores.
When Store Mode is selected, press button on your remote control to enter store mode settings.
If you want to switch to Home Mode when the TV is in Store Mode, press button on your remote control to enter Store Mode Settings and choose Home Mode. Alternatively, turn off Store Mode at > Settings > System > Advanced System.

Note:
• Enabling Store Mode could increase energy consumption.
• How to exit Store Mode varies depending on models/countries/regions.

Using Parental Control
Press button to select Settings > Channels & Inputs > Channels > Parental Control.
The Parental Control setting allows you to block content that is not appropriate for children to watch.
Settings Overview

• **Locks**
  
  **Turning Parental Control On**
  
  1. Turn on Locks to enable the Parental Control function.
  2. Create PIN window displays. Using the D-pad on your remote control, create the password.
  3. You will see other Parental Control settings change from a greyed out state to highlighted. When this occurs, begin adding other settings to the **Scheduled Blocking, Channel Blocking, Program Blocking, Input Blocking, Change PIN** and **Reset** features.

• **Scheduled Blocking**
  
  Block certain channels, programs and inputs during certain periods of time.

• **Channel Blocking**
  
  Block selected channels.

• **Program Blocking**
  
  Block programs by ratings.

• **Input Blocking**
  
  Block selected inputs.

• **Change PIN**
  
  Change the PIN that you use to access Parental Control.

**Note:**

If you forget your password, call the Consumer Electronics Care Centre.

• **Reset**
  
  Reset Parental Control back to the factory setting.

**Reset to Factory Default**

Press button on your remote control to select **Settings > System > About > Reset > Factory reset**.

Restore your device to default settings and erase all data, accounts, files, and downloaded apps.
Game

You can connect to your game console and set up settings to optimize the TV screen for better gaming performance.

Connect a Game Console

You can connect your game console with a HDMI cable to the TV.

To start a game from a game console:

1. Switch on your game console.
2. Press button on your remote control to select Inputs or press button. Select the connected game console as the input source.
3. Start the game.

You can enable the game mode to optimize your TV's settings when playing games with a game console.

Related information

Enabling game mode

Press button on your remote control to select Settings > Display & Sound > Picture > Picture Mode > Game.

Enable Game Mode to optimize the TV's settings to enjoy a better gaming experience with a PC or a game console connected to the TV.

Game Mode will allow:

• Reducing input lag to make sure every press or click matches what is happening on the screen;
• Improving responsiveness to produce very little motion blur;
• Processing YUV 4:4:4 format signals precisely to present accurate image colors.

Note:

• This function may not be applicable in some input sources or applications.

Related information
Connect a Game Console on page 41

Enabling instant game response

Press button to select Settings > Display & Sound > Picture > Advanced Settings > Instant Game Response.

You can enjoy a smooth viewing experience with external device connected to the TV when Instant Game Response is turned on.

Note:

• When Game mode is selected, Instant Game Response will not be switched off automatically.

Enabling FreeSync

Press button to select Settings > Display & Sound > Picture > Advanced Settings > FreeSync.
You can enjoy a smooth viewing experience with external device connected to the TV when **FreeSync** is
turned on.

**Note:**
- Some functions above may not be applicable in some models/countries/regions.

### Enabling PC Sync

Press (+) button to select **Settings > Display & Sound > Picture > Advanced Settings > PC Sync.**

You can enjoy a smooth viewing experience with external device connected to the TV when PC Sync is turned on.

**Note:**
- Some functions above may not be applicable in some models/countries/regions.
- If you want to use PC Sync function, you should press (-) button to select **HDMI Format > Enhanced format** (if your HDMI device supports 4K HDR) in HDMI source.

### SoundBar Settings

When the soundbar device is connected to the TV, You can change the SoundBar Settings at Settings menu for best device sound quality.

When the ARC device is connected to the TV, the sound output is automatically switched to ARC, if the user switches to other sound output channels, the soundbar menu cannot be adjusted, and the sound menu of TV can be adjusted.

Press (+) button on your remote control to select **Settings > Display & Sound > Audio Output > SoundBar Settings.**

**Note:**
- When you connect a soundbar with an HDMI cable, you should set **HDMI control** to On. (+) > **Settings > Channels & Inputs > Inputs > HDMI control.**
- Some soundbar device can't support this function.
- **EQ Modes**
  - You can select **Music, Movie, News, Sport, Night.**
- **Surround Modes**
  - You can set to On to turn on the Surround Modes.
- **Bass Level/Treble Level/Dimmer Level**
  - You can adjust **Bass Level/Treble Level/Dimmer Level.**
- **Reset**
  - Reset current SoundBar Settings to factory mode.

### Sports

**Sports mode setup in picture or sound settings**

Press (+) button on your remote control to select **Settings > Display & Sound > Picture > Picture Mode > Sports.**
Optimized picture for watching sports.

Press button on your remote control to select **Settings > Display & Sound > Sound > Sound Mode > Sports**.

Optimized sound for watching sports events.

**Media**

Media is a central location for you to view or listen to different types of content, such as photos, music and movies. You can view media content through the following methods:

- A USB thumb drive or hard drive.
- Compatible mobile phone, tablet or other personal devices: you can stream movies, music and photos that are stored on compatible personal device and play or view the content on your TV.

By default, there is **Content Sharing** displayed on the Media screen. If your mobile device is connected to the TV, its name also appears on the Media screen.

For more information about **Content Sharing**, please refer to Benefits of Smart TV > Content Sharing in this manual.

**Enjoy Photos/Audio/Video Stored on a USB Device**

You have some ways to enter Media:

- Insert a USB device, a prompt message appears, press to open it.
- Press button to select **MediaCenter** from your Apps list on home page.
- Press button to select **Settings > Apps > MediaCenter > Open**.

Then select **connected devices**.

Select the content you want to play on the screen, like pictures, videos and music.

1. Search the content you want to play.
2. Arrange the content list by **Grid, List**.
Entertainment

3. Sort the content list by Name, Date Modified, Size.

4. Filter the content list by All Media, Music, Photos, Videos.

5. Create a photo, music, or video playlist./Press LEFT button to browse the connected devices. /Press MENU button to edit.

Note:

- Some options in the above table may not be available in some models/countries/regions.

Accessibility Menu Setup

Press \( \mathcal{O} \) button on your remote control to select **Settings > System > Accessibility**.

Accessibility function provides menu options and audio descriptions to aid the visually or hearing impaired.

- **Captions**
  Displays and sets the closed captions. You can set display options and select caption style.
  - **Closed Captioning**
  - Analog Closed Caption
  - Digital Closed Caption
  - Digital Caption Style
  - **Captions**
  - **High contrast text**
    Improves contrast for the visually impaired.
  - **Text to speech**
    Let you specify text-to-speech engine details and speech rate.
  - **Accessibility shortcut**
    When the shortcut is on, you can press both the back and down buttons for 3 seconds to start an accessibility feature.
  - **TalkBack**
    Controls spoken feedback for visually impaired users.
  - **Switch Access**
    Switch Access can collect all of the text you type, except passwords. This includes personal data such as credit card numbers.

**Note:**
- Some options in the above table may not be available in some models/countries/regions.
- The menu is only for reference and may differ from the actual product.

FAQ

In this section you will find the answers to the most frequently asked questions.

Note:

- The images are only for reference and may differ from the actual product.

There is no picture, or the picture is black and white.

Check input cable connections.

Unplug the TV power cord from AC outlet and re-plug after 60 seconds.

There is no sound or the sound is too low.

There is no sound or the sound is too low at maximum volume.
Troubleshooting

Check if Mute mode is set to on.

Check the volume settings.

Check the volume control of the device (cable or satellite box, DVD, Blu-ray, etc.) connected to your TV.

Make sure that the audio cable is connected to the correct audio output connector on the external device.
Troubleshooting

Check whether TV Speaker is selected at ☰ > Settings > Display & Sound > Audio Output > Audio Output.

My TV cannot connect to the network.

Check network status at ☰ > Settings > System > About > Status.

Make sure your modem/wireless router is on and connected to the Internet.

Position your wireless router, modem router, or access point in a central location. Avoid putting it in a corner.

External source connected but no picture or sound.

I have connected an external source to my TV but I get no picture and/or sound.
Troubleshooting

Check whether the connection between the external device and your TV is correct and secure.

Make sure you have made the correct selection of input source.

If the signal is intermittent, unplug the TV power cord from AC outlet and re-plug after 60 seconds.
When devices are connected with HDMI cables

- If there is always no signal, or the signal cannot be restored after plugging and unplugging, you can press button to select **HDMI Format** in HDMI source, to confirm whether the signal can be recognised.
- Change to another HDMI port.
- Change to another HDMI cable.

The remote control does not work.

Confirm that TV still has power and is operational. Press the power button on the TV to determine if the problem is with the remote control or not.

If the TV is not responding to the remote control, then please check if the small light on the remote control flashes when any button is pressed (some remote controls do not support this function).

If the small light does not flash when the remote control button is pressed, the battery power may be low, please replace the batteries with new ones.

Check that the orientation of each battery matches the positive (+) and negative (-) symbols in the battery compartment.

Keep the remote control sensor area clear from obstacles.
Troubleshooting

For Bluetooth remote controls

If the TV does not respond with the Bluetooth remote control, try pairing the remote control to the TV by pressing and holding the and button at the same time.

Schedule Recording cannot be used.

Check if there is a storage device connected to the TV.
Troubleshooting

Check the free space of the storage device. The function will not work if there is not enough storage space on the device.

Check whether your storage device is damaged. If so, it is suggested to format your storage device.

Recording will automatically stop if the signal becomes too weak.

Note:
• Recording function may not work if the read/write speed of the USB device is too slow.
• Recording function may not work because the storage format of your device is unsupported.
• The Recording functions may not be applicable in some models/countries/regions.

Picture Issues

When the TV has a picture problem, these steps may help resolve the problem.

<table>
<thead>
<tr>
<th>Problems</th>
<th>Possible Solutions</th>
</tr>
</thead>
</table>
| The picture is distorted. | • The compression of video content may cause picture distortions, especially in fast moving pictures from sports programs and action movies.  
• If the signal reception is weak or poor, screen distortion may be visible but it is not a malfunction.  
• Mobile phones used close to the TV (within 1m) may cause noise on analogue and digital channels. |
| The picture is blurry or flickering, or cuts out momentarily. | • > Settings > Display & Sound > Picture > Sharpness. You can try to increase or decrease the Sharpness.  
• If you use an external antenna, check the direction, position and connection of the antenna.  
• Adjust the direction of your antenna, or reset or fine tune the channel. |
| The picture appears red, purple, pink and other colors. | • > Settings > Display & Sound > Picture > Calibration Settings > White Balance. You can try to increase or decrease the White Balance. |
## Troubleshooting

<table>
<thead>
<tr>
<th>Problems</th>
<th>Possible Solutions</th>
</tr>
</thead>
</table>
| Picture distorted or appears wavy.     | • Some electrical appliances may affect the TV. If you turn off the appliance and the interference goes away, then move it further away from TV.  
• Insert the power plug of the TV into another power outlet. |

### Related information

## Sound Issues

When the TV has a sound problem, these steps may help resolve the problem.

<table>
<thead>
<tr>
<th>Problems</th>
<th>Possible Solutions</th>
</tr>
</thead>
</table>
| Picture is normal, but no sound.       | • Check the volume settings.                                                       
• Check if ‘Mute’ mode is set to on.     
• Check the volume control of the device (cable or satellite box, DVD, Blu-ray, etc.) connected to your TV. |
| The speakers are making an odd sound.  | • Make sure that the audio cable is connected to the correct audio output connector on the external device.  
• For antenna or cable connections, check the signal information.  
• A low signal level may cause sound distortions. |
| Sound distorted or appears wavy.       | • Some electrical appliances may affect the TV. If you turn off the appliance and the interference goes away, then move it further away from TV.  
• Insert the power plug of the TV set into another power outlet. |
| Sound is blurry or cuts out momentarily.| • If you use an external antenna, check the direction, position and connection of the antenna.  
• Adjust the direction of your antenna or reset or fine tune the channel. |

### Note:

- This product does not support decoding of DTS CD bitstreams. Playback of this format may produce undesirable noise.

## External Device Connection Issues

When the TV has difficulties with external device connection, these solutions may help resolve the problem.

<table>
<thead>
<tr>
<th>Problems</th>
<th>Possible Solutions</th>
</tr>
</thead>
</table>
| The TV is having trouble receiving a signal in the cable box. | • If there is no signal occasionally, unplug cable from TV and re-plug after 60 seconds.  
• If there is always no signal, or the signal cannot be restored after plugging and unplugging, you can press button to select HDMI Format if you select HDMI as input, to confirm whether the signal can be recognized.  
• Change to another HDMI port.  
• Change to another HDMI cable. |
## Troubleshooting

<table>
<thead>
<tr>
<th>Problems</th>
<th>Possible Solutions</th>
</tr>
</thead>
</table>
| There is no sound.           | • Check whether ARC is selected at > Settings > Display & Sound > Audio Output > Audio Output. If not, you need to check whether the external power amplifier device is connected to the ARC port or optical port of the TV.  
• > Settings > Display & Sound > Audio Output > Digital Audio Out. You can try to select Auto, Pass Through, PCM, Dolby Audio - Dolby Digital, or Dolby Audio - Dolby Digital Plus.  
• Whether the power amplifier device port is connected correctly.  
• If you select HDMI as input, you can try > HDMI Format. |

### Related information

External source connected but no picture or sound. on page 50

## HDMI & CEC Issues

When HDMI & CEC is not working, these steps may help resolve the problem.

<table>
<thead>
<tr>
<th>Problems</th>
<th>Possible Solutions</th>
</tr>
</thead>
</table>
| HDMI & CEC does not work.    | • Confirm that the device is a HDMI & CEC compatible device.  
• Check if the power cable of the HDMI & CEC device is properly connected.  
• Check the cable connection of the HDMI & CEC device is secure.  
• Check HDMI & CEC feature of your TV is turned on.  
• > Settings > Channels & Inputs > Inputs > HDMI control  
• Check HDMI & CEC feature of the connected device is turned on.  
• Depending on the connected HDMI device, the HDMI & CEC control feature may not work. |

## Application Issues

When some apps do not play, this may help resolve the problem.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Solutions</th>
</tr>
</thead>
</table>
| Netflix cannot be played.    | • > Settings > Apps > See all apps > Netflix > Force stop, then reopen to try again.  
• You can try to restart the TV at > Settings > System > Restart. |

## Media Files

When files do not play, this may help resolve the problem.
## Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Some files cannot be played.</td>
<td>• Most files can be played back, but you might experience problems with corrupted files or files with high-bitrate, unsupported resolution, unsupported container or codec formats.</td>
</tr>
</tbody>
</table>

## Voice Service Issues

When some Voice service will not function, this may help resolve the problem.

<table>
<thead>
<tr>
<th>Problems</th>
<th>Possible Solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alexa cannot be heard.</td>
<td>• You can try to log into your Amazon account.</td>
</tr>
<tr>
<td></td>
<td>• If you hear &quot;I don't understand&quot; from the voice recognition, please change account or log out of the account.</td>
</tr>
<tr>
<td></td>
<td>• For more information about Alexa, please refer to Benefits of Smart TV &gt;Using Voice Control &gt; Alexa Setup in this manual.</td>
</tr>
</tbody>
</table>

## Other Issues

Use these procedures to resolve other issues that may occur.

<table>
<thead>
<tr>
<th>Problems</th>
<th>Possible Solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>The TV is hot.</td>
<td>• Watching TV for an extended period of time causes the panel to generate heat. The heat from the panel is dissipated through internal vents running along the top of the TV.</td>
</tr>
<tr>
<td></td>
<td>• After extended use, you may feel heat when touching it. This heat is not a defect and does not affect the TV's functionality.</td>
</tr>
<tr>
<td>The TV smells of plastic.</td>
<td>• This smell is normal and will dissipate over time.</td>
</tr>
<tr>
<td>The plastic cabinet makes a &quot;clicking&quot; type of sound.</td>
<td>• The &quot;clicking&quot; sound can be caused when the temperature of the TV changes. This change causes the TV cabinet to expand or contract, which makes the sound. This is normal and the TV is OK.</td>
</tr>
<tr>
<td>When I turn on my TV, there is a delay for a few seconds before the picture appears. Is this normal?</td>
<td>• Yes, this is normal. The TV is initializing and searching for the previous setting information.</td>
</tr>
</tbody>
</table>
